### Working group

The National Risk Assessment was developed by a working group, representing different interests, and consisting of the following people.

| Name             | Chamber       | Qualifications                                                                                                                                                                                                                                                                                                                        |

| NN | Environmental |                                                                                                                                                                            |

Since there is a vacancy in the environmental chamber the voting system is 1-1-1, although in principle the working group decides by consensus (if a second environmental chamber representative is found we will go back to a 2-2-2 voting set up).

The working group was coordinated by Arjan Alkema, Deputy Director of FSC the Netherlands. The working group was supported by an external consultant Patrick Jansen of Bosmeester.

## Consultation

The consultation was conducted in May-June 2018. Comments were received from:

- Leo van der Vlist (NCIV)
- James Schadenberg (ControlUnion)
- Willems, A.J.H. (Kroondomein Het Loo)
- Zier, Kristina (Pfleiderer)
- Maarten Willemen (AVIH)
- Esther Freriks (VNP)
- Stemmer-Letnik Ute (MM-karton)
- Henk Wanningen (Staatsbosbeheer; by telephone)

The comments can be grouped in two distinct categories. Comments that address specific issues (e.g. availability of more recent figures for gender wage gap) and comments that are highly political. Note that during the consultation the risk for Categories 3.1 and 3.3 were considered to be specified. The politically charged comments were all calling on FSC to not put more burden on the economic sector or even threatened to leave the FSC system if this draft NRA remained unchanged.

The comments dealing with contents were all checked and where relevant changes in the document were made.

## 2. List of experts involved in the risk assessment and their contact details

| Name & Organisation                                                        | Qualification                          | Contact details                                                          |

### 3. National Risk Assessment maintenance

The responsible body (in accordance with section 2 of FSC-PRO-60-002 V3-0) is  
FSC Netherlands  
Wilhelminapark 37  
3581 NK Utrecht  
info@fsc.nl

The responsible body will review the NRA periodically (every 5 years) or update the NRA continuously, if needed (in accordance with section 10 of FSC-PRO-60-002 V3-0).

### 4. Complaints and disputes regarding the approved Country Risk Assessment

In case of complaints stakeholders may contact the responsible body. The responsible body will handle the complaint in accordance with section 12 of FSC-PRO-60-002 V3-0 as follows:

- Acknowledgment of complaints within two (2) weeks of receipt of a complaint.

- The responsible body will investigate the complaint that meets the conditions (see below) after date of acknowledgement over a period of 6 weeks.
- Conditions under which a complaint shall proceed according to *FSC-PRO-01-008 Processing formal complaints in the FSC certification scheme*:
  - contain the name and contact information of the Complainant and be signed by the legal representative of the Complainant or by the individual in question if the complaint is not filed by an organization;
  - be written in Dutch or English, other languages will not be accepted;
  - list the Certificate Holder(s) and all associated companies known to the Complainant including their certificate codes, against which the complaint is lodged;
  - specify the events and issues that lead to the complaint;
  - contain evidence to support each element or aspect of the complaint;
  - indicate whether and in what form the issues have been raised with the Defendant prior to lodging the complaint and what response was provided;
  - contain an agreement to share the complaint with the Defendant and other Parties to the Complaint;
  - contain an agreement to adhere to the terms and provisions of this procedure.
- The responsible body will manage a complaint registry, including recording and filing of all complaints received, actions taken and results of complaint evaluations.
- By latest 6 weeks after acknowledgement of the complaint the responsible body will inform the complainant about the status of the complaint.
- By latest 3 months the responsible body must close all complaints and inform complainants about the actions taken or the rejection including justification.

## 5. Risk assessment

This section describes the process of risk assessment as specified in the Country Risk Assessment Framework for each Controlled Wood category and for each described indicator (where relevant).

In all Control Wood categories the area under assessment is the Netherlands as a whole. The Netherlands is a small country and almost all legislation is on the national level. Relevant studies almost all focus on the national level.

### 5.1 CONTROLLED WOOD CATEGORY 1: ILLEGALLY HARVESTED WOOD

#### Overview

This category covers risk assessment of illegality and includes identification of applicable legislation and an assessment of law enforcement. Indicators for legality assessment are divided into six sub-categories of applicable legislation:

- Legal rights to harvest
- Taxes and fees
- Timber harvesting
- Third parties' rights
- Trade and transport
- Due diligence/due care

Indicators are considered not applicable when there are no relevant laws or regulations.

According to Transparency International's 2017 Corruption Perceptions Index<sup>1</sup>), which measures perceived levels of public sector corruption in countries around the world using a score of 0-100 (where 0 is highly corrupt and 100 is very clean), the Netherlands was ranked equal 8th (alongside Canada, Luxembourg and the UK) out of 180 countries assessed. It scored a corruption index of 82, meaning it has a very low perception of corruption.

The 2017 Worldwide Governance Indicators compiled by the World Bank<sup>2</sup>) show that the Netherlands was in the 98.56 percentile rank for regulatory quality among all countries in the world in 2017 (up from 96.21 in 2012), the 97.12 percentile rank for rule of law (slightly down from 97.65), and the 95.19 percentile rank for control of corruption (down from 96.21).

The Working Group has taken this information (CPI, Governance Indicators) into consideration for all of the relevant indicators in Category 1.

<sup>1</sup> [https://www.transparency.org/news/feature/corruption\\_perceptions\\_index\\_2017](https://www.transparency.org/news/feature/corruption_perceptions_index_2017)

<sup>2</sup> <http://info.worldbank.org/governance/wgi/index.aspx#report>

Note: All Netherlands legislation is freely available online at <https://wetten.overheid.nl/zoeken>. Readers should be aware that most legislation has been amended by subsequent legislation, and that, while the extensive range of amending legislation has not been listed in this risk assessment, full account has been taken of relevant amendments.

### General/contextual information<sup>3</sup>

#### Forest

The Netherlands has a forested area of approximately 370,000 hectares, which is 10% of the land area (and 217 m<sup>2</sup> per capita). Two hundred years ago the forest area was much smaller and comprised of about 100,000 hectares (mainly coppice woodland). Particularly in the 1930's, forest was planted mainly on poor soils: heather lands and drift sands.

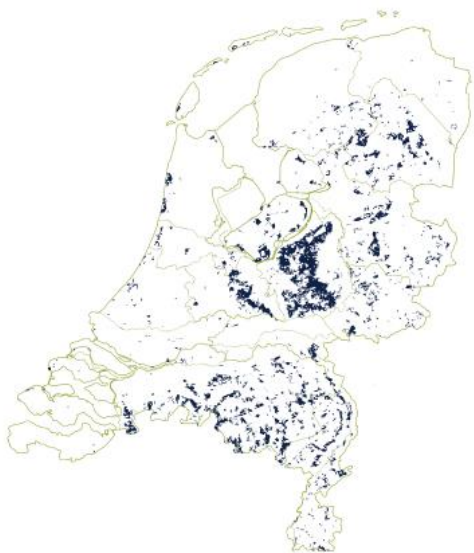

Figure: Forest land in the Netherlands (black spots)  
Total Forest area approx. 370.000 hectares ha, of which:

- Strict forest reserve (Bosreservaat) IUCN-category I) – 3,000 ha (1%)

---

<sup>3</sup> All data (except land tenure and ownership) and map are taken from: Probos, Kerngegevens bos en hout in Nederland 2015 (Key data forest and timber 2015), Bosenhoutcijfers.nl. Map can be found here: <http://www.bosenhoutcijfers.nl/nederlands-bos/oppervlakte/>

- National parks (IUCN category II) - 31,400 ha (9%)

Other protected forest (IUCN categories III-VI) – 56,400 ha (16%).

In 26% of forested area there is no production. In the remaining 74% production takes place, although scale and intensity differs from place to place.

Approximately half of the forest is dominated by coniferous trees (main species *Pinus sylvestris*), the other half by deciduous trees (dominant species oak (*Quercus robur*), beech (*Fagus sylvatica*), willow (*Salix spec.*), birch (*Betula pendula*), poplar (*Populus spec.*))<sup>4</sup>.

Land tenure and ownership (Source: M.J. Schelhaas et al, 2014, see footnote 3):

State: 50% of all forest is owned by the state (33% State Forest Service, 14% municipalities, 3% other): multifunctional forest;

Private: 34% of all forests is owned by private forest owners (1.250 FMUs > 5 ha; 30.000 FMUs < 5 ha): stronger focus on wood production;

Nature conservation organizations: remaining 16% of forest is owned by nature conservation organisations: stronger focus on ecology (and cultural heritage).

#### Sources of legal timber

| <p>Human Rights Watch: <a href="http://www.hrw.org">http://www.hrw.org</a></p>                                        | <p><u>World Report 2017</u><br/> <a href="https://www.hrw.org/sites/default/files/world_report_download/wr2017-web.pdf">https://www.hrw.org/sites/default/files/world_report_download/wr2017-web.pdf</a></p> <p>“In February, the government expanded the list of safe third countries for asylum seekers. Countries from countries deemed safe are presumed not to need intercountry protection and are subject to accelerated procedures, raising concerns about the quality of individual examination of asylum claims. In September 2016, the country’s highest administrative court affirmed the legality of Albania’s designation as a safe country of origin.</p> <p>The Dutch government continued to offer support that is limited in duration and scope to rejected asylum seekers, with assistance contingent on their cooperation with removal from the country. In February, several UN special rapporteurs urged the Dutch government to provide emergency assistance to rejected asylum seekers.</p> <p>Refugee rights groups criticized Dutch authorities over longer waits for asylum determinations and family reunification procedures.</p> <p>At the start of 2016, NGOs reported threats and discrimination against LGBT asylum seekers at asylum facilities, and a Dutch independent monitoring body, the Dutch Board for Protection of Human Rights, found in February that LGBT asylum seekers at a large facility face discrimination.</p> <p>In May, the Netherlands enacted a law allowing authorities to strip Dutch citizenship from dual countries as young as 16 if they determine that they have joined or fought abroad with a terrorist group and pose an “immediate threat” to country security. No court conviction is required. Those whose Dutch citizenship is revoked have only four weeks to appeal.</p> <p>In January, the Netherlands ratified the UN Convention on the Rights of Persons with Disabilities.”</p> | <p>Country</p> |

| Chatham House Illegal Logging Indicators Country Report Card<br><a href="http://indicators.chathamhouse.org/explore-the-data">http://indicators.chathamhouse.org/explore-the-data</a>                                                           | <p>2013 Assessment Findings<br/><a href="https://indicators.chathamhouse.org/explore-the-data/netherlands">https://indicators.chathamhouse.org/explore-the-data/netherlands</a></p> <p>“The assessment indicates that the Netherlands has continued to show a strong response to the problem of illegal logging and related trade. The government played an active part in the development of the EU’s FLEGT Action Plan, and has been supporting the negotiation and implementation of voluntary partnership agreements with producer countries.</p> <p>The government has also been promoting the production and consumption of sustainable timber. It has a comprehensive procurement policy, established the Sustainable Trade Initiative and helped to launch the European Sustainable Tropical Timber Coalition.</p> <p>As a result of these government actions as well as engagement by the private sector, there is a high proportion of certified wood-based products on the Dutch market as well as a large number of companies with chain-of-custody certification. A high level of media coverage on the issue of illegal logging also indicates that there is widespread awareness of this issue.</p> <p>This response is thought to be partly responsible for the decline in imports into the Netherlands of timber-sector products likely to be illegal, currently estimated to comprise two per cent of the total.”</p> | Country |
| Transparency Intercountry Corruption Perceptions Index<br><a href="https://www.transparency.org/news/feature/corruption_perceptions_index_2017">https://www.transparency.org/news/feature/corruption_perceptions_index_2017</a>                 | The Netherlands scores 82 points on the Corruption Perceptions Index 2017 on a scale from 0 (highly corrupt) to 100 (very clean). The Netherlands ranks 8th out of 180 with rank no. 1 being the most clean country.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Country |
| Amnesty Intercountry Annual Report: The state of the world’s human rights -information on key human rights issues, including: freedom of expression; intercountry justice; corporate accountability; the death penalty; and reproductive rights | <p><u>Amnesty International Annual Report 2015/2016</u><br/><b>“REFUGEES’ AND MIGRANTS’ RIGHTS</b><br/><b>Immigration detention</b></p> <p>Solitary confinement continued to be used in immigration detention centres, both as a means of control and as a punitive measure. In March, body scan equipment was introduced in detention centres,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Country |

making strip searches of detained migrants largely unnecessary. In September the government tabled a draft law regulating immigration detention. The law mentions the need to consider alternatives to detention. However, it includes provisions that would, in practice, likely lead to harsher conditions for detained irregular migrants and asylum-seekers. The law also fails to establish an effective mechanism to prevent the detention of vulnerable groups, and the authorities' power to use solitary confinement remain unchanged.

#### **Economic, social and cultural rights**

The government failed to implement the recommendation by the European Committee of Social Rights that all people, including irregular migrants, should unconditionally have access to shelter and basic necessities. In April, the government put forward a proposal to establish shelters in a limited number of municipalities, but make accommodation there dependent on the willingness of the irregular migrant to cooperate in their deportation.

#### **Refoulement**

The government continued its attempts to deport rejected asylum-seekers to southern and central Somalia, including – under certain circumstances – to al-Shabaab controlled areas, against guidelines issued by UNHCR, the UN refugee agency. In August, the government decided to temporarily halt forced returns of Uighurs to China, in anticipation of a new guidance report.

In May, Mathieu Ngudjolo, a former Congolese militia leader, was returned to the Democratic Republic of the Congo despite alleged fears for his safety, after the Council of State rejected his request for asylum. Mathieu Ngudjolo was acquitted by the ICC of war crimes and crimes against humanity, a decision confirmed on appeal on 27 February.

#### **DISCRIMINATION – POLICING**

In response to concerns about ethnic profiling by the police, the government committed to undertaking measures focused on awareness raising and training of police officers. However, it still did not introduce clear guidelines to limit widespread stop-and search powers that increase the risk of ethnic profiling, or institute systematic monitoring of stop-and-search operations.

The legal owner also has the management rights to the land, except when these are leased to another person or organization. Management rights are leased on the basis of a lease contract. Land lease is regulated in the New Dutch Civil Code, book 7, title 5. Land lease of forest land is not very common in the Netherlands according to the Working Group, but examples exist. These are mainly long-time lease contracts that have been recorded by the Cadastre.</p> <p>All legal ownership is registered by the notary and subsequently registered at the Cadastre. The Cadastre is a legally defined body that implements land registry legislation. The legal basis for the Cadastre is regulated</p> |

Of all parcels the dimensions, its owners, and land use are recorded (Article 48). (the recording goes back 200 years, meaning that the Cadastre has a wealth of historic data which may be used when there is uncertainty about ownership.) Purchase of land requires formal agreement by both parties through a notary (Article 18). In case of disagreement of land ownership this is marked at the Cadastre and as long as the conflict is not solved land transactions cannot be carried out (information Suzanne Valkman).</p> <p>All companies and legal entities in the Netherlands are obliged to subscribe to the Handelsregister (Trade Register) at the Chamber of Commerce. In the register seat, data on property, jurisdiction data and financial data of the entity can be found. This is laid down in the Handelsregisterwet 2007(Act on Trade Register 2007) (Article 5 and 6).</p> <p><u>Description of risk</u><br/> Conflicts on land tenure and management rights are scarce in the Dutch forest sector and there are no indications that the land tenure and management rights are issued in violation of legislation, This is confirmed by Suzanne Valkman (who until very recently worked for the land cadastre), who states that land tenure is seldom challenged in the Netherlands. This is also confirmed by Christelle van den Berg, stating that literally all land is registered and recorded on maps. Van den Berg adds that on the maps managed by the cadastre there are no uncertainties regarding borders. Van den Berg mentions that the number of complaints about land ownership (that is: disagreement between parties) is low, particularly when compared to other countries. If conflicts over land tenure occur it is mainly about the correct border between parcels. When the property owners cannot find a solution themselves, these conflicts are in most cases settled by measurements in the field by the Cadastre. . A Google search revealed no examples of major conflicts and both</p> |

|                            |                                                                                                                                                                                          |                                                                                                                                                                                    | <p>the Working Group as well as the FSC Standards Development Group confirmed this conclusion (interview with Ernst Cramer). There are therefore no indications that land tenure and management rights are a problem in the Netherlands.</p> <p>The Netherlands ranks high on the Worldwide Governance Indicators with 'rule of law' being 97.12 and 'control of corruption' at 94.17.</p> <p>Corruption is low in the Netherlands, with an 82 points score and an 8<sup>th</sup> rank (Transparency International, Corruption Perceptions Index 2018).</p> <p><i>Risk conclusion</i><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> <p>For this indicator the area under assessment is determined to be 'low risk'.</p> |
| 1.2<br>Concession licenses | <p><b>Applicable laws and regulations</b><br/>Not applicable</p> <p><b>Legal Authority</b><br/>Not applicable</p> <p><b>Legally required documents or records</b><br/>Not applicable</p> |                                                                                                                                                                                    | <p>There is no concession licenses program in the Netherlands where the government gives a long-term license to a private organization to harvest wood in a given forest. Harvesting rights are linked to tenure rights. Wood is sold by the owner, both private and public, to wood traders or contractor.</p> <p>This indicator is not applicable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

However, according to the Nature Conservation Act (Article 4.2: It is forbidden to wholly or partially fell a timber stand or to have it felled, with the exception of the periodic felling of griend or coppice wood, without prior notification to the Province) forest managers have to report felling at least one month prior to the work to the relevant province. Only fellings the size of at least 1,5 times the tree height have to be reported, conversely, thinnings do not need to be reported. Provinces are the legal authorities for the Nature Conservation Act. They have the right to withhold permission (or even prohibit) the felling. The province has one month to do so. After this one month the forest owner has the right to execute the felling (silent permission). Forest managers are obliged to establish a new forest by planting or natural regeneration within 3 years after clearcutting. The province has the right to increase this period to maximum 6 years when using natural regeneration.<br><br><u>Description of risk</u><br>No statistics are available on the number of violations of the Nature Conservation Act concerning harvesting. The country coordinator of enforcers forest felling (Leon Janssen, 2019) has indicated that provinces employ on average 2-3 people enforcers. These provincial enforcers meet regularly at national level where they discuss amongst other things violations of the Nature Conservation Act. Discussions about these violations are recorded in the minutes of the meetings, but no statistics are produced. Janssen stated that violations do occur, but they are isolated, small scale and mostly concern |

|  |  |  | <p>small patches of trees in open landscape (lanes lined with trees, small wood stands). For the law also these lanes and smaller stands are considered wood lands where prior notification of felling and replanting is obliged. In most cases replanting does not occur, as creation of agricultural land is the main driver. Janssen estimates that at national level around 100 of these small scale fellings occur.</p> <p>It is rare that the courts challenges forest managers for violation of forest felling procedures.</p> <p>A Google search confirmed this. Both statements are confirmed by the Working Group and an Internet search. The working group also takes into consideration that small volumes of wood are involved in these illegal fellings.</p> <p>The Netherlands ranks high on the Worldwide Governance Indicators with 'rule of law' being 97.12 and 'control of corruption' at 94.17.</p> <p>Corruption is low in the Netherlands, with an 82 points score and an 8<sup>th</sup> rank (Transparency International, Corruption Perceptions Index 2018).</p> <p><i><u>Risk conclusion</u></i><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> <p>For this indicator the area under assessment is determined to be 'low risk'.</p> |

VAT is based upon EU Directives. This means that the principles and the structure of the tax are in general the same throughout the whole EU.</p> <p>The legal obligation to submit a tax declaration is a direct consequence of the law. The taxpayer who makes the declaration is obliged to do so clearly, firmly and without reservation (General law on government taxes 1959, article 7). In many cases, the first time a taxpayer has to make a declaration, he must report this himself. In the following years, the tax authorities automatically send a tax return form.</p> <p>For income tax and corporate income tax, the tax inspector determines the tax liability on the basis of the tax declaration in a tax assessment. With these taxes, the declaration therefore serves as a tool for the tax authorities in determining the tax assessment. For these taxes it applies that the tax is only formally due after the tax inspector has issued an assessment. (Chapter III and IV of the General law on government taxes 1959)</p> <p>All organizations conducting commercial activities have to be registered with the Chamber/Court of Commerce (as a legal entity, see also indicator 1.1) and the Tax Office (to obtain a tax number). Registrations at the Chamber of Commerce (KvK) and Tax Office are linked so it is virtually impossible to be registered with one and not at the other. (Chamber of</p> |

|  |  | <p>Wet op de omzetbelasting 1968<br/>Turnover Tax Act 1968<br/><a href="http://wetten.overheid.nl/BWBR0002629/2016-05-01">http://wetten.overheid.nl/BWBR0002629/2016-05-01</a></p> | <p>Commerce submits data on registered company to Tax Authorities as of Article 28 of Act on Trade Register 2007) Once registered, as a company it is automatically requested to file their tax assessments. Chamber of Commerce works under jurisdiction of Act on Trade Register 2007 (Wet Handelsregister 2007); Tax Office works under jurisdiction of General law on government taxes 1959 (Algemene wet inzake rijksbelastingen 1959), <i>Income Tax Act</i> (Wet Inkomstenbelasting 2001) and the Corporate Income Tax Act (Wet op de Vennootschapsbelasting 1969).</p> <p>All of the above is controlled by the Dutch Tax Authorities. Every company must state its financial turnover in a tax return and, in addition, must demonstrate certain accounting practices. All documents are sent to the finance authorities for verification – also irrespective of size, volume of sales and form of organization. All cash flows have to be documented to verify and to avoid illegal and black market earnings. Not mentioning income is seen as tax evasion which may result in severe fines.</p> <p><u>Description of risk</u><br/>According to the Working Group, small amounts of firewood is probably sold on the black market so (without paying VAT or other sales taxes). No statistics are available. The sale of firewood on the black market is only done by small forest owners and for very limited amounts of wood (only hundreds of m3 in the whole country, where total production in the Netherlands is approximately 1,3 million m3; last figure from Schelhaas &amp; Clerkx (2015)). It is not done systematically or on a large scale</p> <p>There are no statistics available on the evasion of value added taxes and other taxes in the forest sector.. Recent research indicates that in general evasion of value added taxes does not occur at a large scale in the Netherlands: in 2016 the FIOD (Fiscal Intelligence Service) completed</p> |

Tax return is described in Chapter 2 of this law. A tax return (tax declaration) is a declaration by the taxpayer (individual, organization) in the Netherlands on the basis of which the tax-levying authority (tax authorities) can determine the tax due. The content of the taxpayer's statement depends on the tax type for which the declaration is submitted (e.g. income tax, corporate income tax).</p> <p>The legal obligation to submit a tax declaration is a direct consequence of the law. The taxpayer who makes the declaration is obliged to do so clearly, firmly and without reservation (General law on government taxes 1959, article 7). In many cases, the first time a taxpayer has to make a declaration, he must report this himself. In the</p> |

With these taxes, the declaration therefore serves as a tool for the tax authorities in determining the tax assessment. For these taxes it applies that the tax is only formally due after the tax inspector has issued an assessment. (Chapter III and IV of the General law on government taxes 1959)</p> <p>All organizations conducting commercial activities have to be registered with the Chamber/Court of Commerce (as a legal entity, see also indicator 1.1) and the Tax Office (to obtain a tax number). Registrations at the Chamber of Commerce (KvK) and Tax Office are linked so it is virtually impossible to be registered with one and not at the other. (Chamber of Commerce submits data on registered company to Tax Authorities as of Article 28 of Act on Trade Register 2007) Once registered, as a company it is automatically requested to file their tax assessments. Chamber of Commerce works under jurisdiction of Act on Trade Register 2007 (Wet Handelsregister 2007); Tax Office works under jurisdiction of General law on government taxes 1959 (Algemene wet inzake rijksbelastingen 1959), <i>Income Tax Act</i> (Wet Inkomstenbelasting 2001) and the Corporate Income Tax Act (Wet op de Vennootschapsbelasting 1969).</p> <p>An important notion is that forest companies are exempted from income taxes (Income Tax Act 2001 Article 3.11: Exemption for forestry). Website Tax Authorities explains: 'The profit from a forestry company is exempt from taxation. "Forest" is a very broad concept. We also consider trees as road planting or the trees around a farm as a forestry company. The forest company may be part of a more comprehensive company.'</p> |

|                                   |                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                        | <p><i>Description of risk</i><br/>Legislation and regulatory control are strong in the Netherlands. Illegal sales of timber is therefore scarce in the Netherlands, but small amounts of mainly firewood are sometimes sold without sales documents. It is estimated that this concerns only a very small proportion of all the wood being sold in the Netherlands. But more important is that forestry is exempt from taxation, so tax evasion is by definition non-existent.</p> <p>An article in quality newspaper NRC (March 2016) suggests that income tax evasion in the Netherlands occurs at small scale. The article refers to a spokesperson at the Tax and Customs Administration who says that monitoring based on sampling suggest that less than 1% of all tax returns are incorrect or incomplete.</p> <p>Corruption is low in the Netherlands, with an 82 points score and an 8<sup>th</sup> rank (Transparency International, Corruption Perceptions Index 2018).</p> <p><i>Risk conclusion</i><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> <p>For this indicator the area under assessment is determined to be ‘low risk’.</p> |

The Nature Conservation Act, however, prescribes that each management activity that potentially has a <b>significant</b> negative impact on protected flora and fauna shall be assessed on the consequences: this assessment is described in article 2.8 clause 4 and 5 for activities affecting Natura 2000 habitats and article 3.17 for</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Recognition scheme for forest contractors 2018)<br/><a href="https://www.skbnl.nl/">https://www.skbnl.nl/</a></p> | <p>activities affecting species. Note that the aforementioned clauses of the law are a verbatim implementation of EU Habitat Directive (see also table under indicator 1.9). This is an indirect requirement for harvesting techniques and technology. The assessment may for example affect the period of harvesting (dry period to prevent track formation in the soil) and the protection of nests of bird of prey, anthills and burrows. For tree felling (Forest management) a voluntary Code of Conduct is available. Although not legally binding the Code does offer benefits for the forest owner: if a forest manager adheres to these guidelines no violation of the Nature Conservation Act is deemed to occur. The Code of Conduct is a recognized tool to apply with legislation (Konings 2019). Molendijk (2019) says that if a (larger) forest manager states to follow the guidelines of the Code law enforcers assume (and rightly so in almost all cases) that the forest manager lives up to the relevant chapters of the Nature Conservation Act.</p> <p><u>Description of risk</u><br/>Every province has several law enforcers for the Nature Conservation Act. They proactively visit harvesting sites and are sometimes notified of proposedly incorrect timber harvesting. They also use aerial photography to check fellings and/or trace illegal fellings. The country coordinator of forest felling enforcers (formerly Forest Act) has indicated that provinces employ on average 2-3 people enforcers. . These provincial enforcers meet regularly at national level where they discuss amongst other things violations of the Nature Conservation Act. Violations do occur, but according to Leon Janssen they are mostly small scale and mostly concern small patches of trees in open landscape (lanes lined with trees, small wood stands). For the law also these lanes and smaller stands are considered wood lands where prior notification of felling and replanting is obliged. In most cases replanting does not occur, as creation of agricultural land is the main driver. Janssen estimates that at national level around 100 of these small scale fellings occur. This</p> |

|  |  |  | <p>is confirmed by Ben Molendijk. He adds that it concerns small patches. Areas of 0,5 hectare is very exceptional. Molendijk also adds that in case this kind of illegal felling is discovered and followed up the authorities enforce replanting of the area.<br/>Note that is not the harvesting techniques or technology that is violated here.</p> <p>As for the Code of Conduct<br/>Cases are mainly settled out of court. It is rare that the courts challenges recognized forest managers for violation of forest felling procedures. Law enforcement is therefore strong on this subject.</p> <p>Although not legally binding the Code does offer benefits for the forest owner: if a forest manager adheres to these guidelines no violation of the Nature Conservation Act is deemed to occur. Ben Molendijk says that if a (larger) forest manager states to follow the guidelines of the Code law enforcers assume (and rightly so in almost all cases) that the forest manager lives up to the relevant chapters of the Nature Conservation Act.</p> <p>This is confirmed by the Working Group. According to the Working Group there is a strong public involvement in timber felling the Netherlands. The public regularly reacts on what they think is incorrect timber felling (e.g. felling during bird breeding season). No data exists on the number of violations.</p> <p>In addition forest contractors generally adhere to the requirements of the so-called Erbo-regulation. The Erbo-regulation is widely adopted by (forest) contractors. ErBo is an voluntary initiative of forest owners and forest contractors jointly to guarantee the quality of forest contractors. The ErBo contributes to the professionalization of the sector, as the ErBo ensures that the business operations of the participants comply with the applicable laws and regulations, but also regulates matters such as safe working conditions,</p> |

|  |  |  | <p>regimes have been assessed and show that the activity is okay</p> <p>In sum, the EU nature conservation <i>acquis communautaire</i> has been completely and rigidly implemented and has even been complemented with extra cumulative domestic forestry and nature conservation legislation ('double safety net'). This <i>acquis</i> and domestic forest and nature conservation law is considered to be a strict protection scheme and therefore an essential part of a symbiotic policy mix combatting illegal logging, leading to and supporting the overall required EUTR due diligence (DDS). (Kirstenkas 2013, Kirstenkas et al 2017).</p> <p>Natura 2000 areas<br/>The Netherlands has more than 160 Natura 2000 areas. All these areas are within the Nature Network of the Netherlands (NNN). This is the Dutch network of existing and new nature reserves. The Natura 2000 sites are designated under the Birds Directive and the Habitats Directive. They cover an area of more than 1.1 million ha. About 69% is water (approx. 670.000 hectares), the rest is land (approx. 340.000 hectares).<br/>The designation of a Dutch nature reserve as a Natura 2000 site is done with a designation decision of the Secretary of State for Economic Affairs. The designation decree states which goals the Netherlands pursues for a specific area, for example which plants and animals deserve protection. Subsequently, a management plan will be drawn up by the authorities in close consultation with the parties involved, which will include information on what measures are needed to achieve the goals. It also indicates which activities (including forest management activities) may take place in an area without a permit (Source: Ministry of Agriculture, Nature and Food Quality)</p> |

|  |  |  | <p>Harvesting cannot take place before all assessments have been made and permission has been granted. (in cumulation with each other (Natura 2000-habitats testing, NNN-test and Wnb-notification on logging. See matrix above).</p> <p><b>Species</b><br/> Every province has several law enforcers for the Nature Conservation Act organized within 'Omgevingsdiensten' (Environmental Services). Omgevingsdiensten (Environmental Services) are executive in supervision and enforcement of the Nature Conservation Act. They proactively visit harvesting sites and are sometimes notified of proposedly incorrect timber harvesting. They also use aerial photography to check fellings. The country coordinator of forest felling enforcers (formerly Forest Act) has indicated that provinces employ on average 2-3 people enforcers. Violations do occur, but according to Leon Janssen they are mostly small scale and mostly concern small patches of trees in open landscape (lanes lined with trees, small wood stands). For the law also these lanes and smaller stands are considered wood lands where prior notification of felling and replanting is obliged. In most of these cases replanting does not occur, as creation of agricultural land is the main driver. Janssen estimates that at national level around 100 of these small scale fellings occur annually. This is confirmed by Ben Molendijk. He adds that it concerns small patches. Areas of 0,5 hectare is very exceptional. Molendijk also adds that in case this kind of illegal felling is discovered and followed up the authorities enforce replanting of the area. Violations do occur. Cases are mainly settled out of court. It is rare that the courts challenges recognized forest managers for violation of forest felling procedures. Law enforcement is therefore strong on this subject. This is confirmed by the Working Group. According to the Working Group there is a strong public involvement in timber harvesting the Netherlands. The public regularly reacts on what they think is incorrect timber harvesting</p> |

|  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--|--|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  |  | <p>(e.g. harvesting during bird breeding season). No data exists on the number of violations.</p> <p>In general, the conservation efforts in forests have positive effects on species: over the last at least ten years quality of species occurrence has increased in forests: “Indicator species of mammals, breeding birds, reptiles and butterflies from terrestrial nature reserves since 1990 on average decreased, but the last ten years the average trend is up again. Of the species that are included in this indicator, 32 are progressing whereas for 37 quality is decreasing.</p> <p>The kind of nature areas of where these indicator species occur are forest, heather, dunes and extensively managed grasslands. There is a big difference between developments in forests at the one hand and open nature areas on the other hand. There has been a moderate increase in quality in forests, this trend has stabilized in the last ten years. In the open nature areas, on the other hand, a reduction of 50% has been recorded; this trend has stabilized in the last ten years.” (IPO 2017, p.13)</p> <p><b>Protected areas</b></p> <p>The Natura 2000 sites are part of a network of nature reserves in the European Union that are protected under the Birds Directive (EC 1979) and the Habitats Directive (1992). These directives indicate which types of nature (habitat types) and which species must be protected. The Netherlands is obliged to keep or bring the species and habitat types in a favourable conservation status.</p> <p>There are no statistics of illegal fellings (or in general illegal forest management activities) in Natura 2000 areas. According to law enforcer Van Gervink illegal felling within N2000 areas does take place but is limited in area (a few hectares per year). Illegal felling may be both intentional (party is aware of breaching the law, e.g. without applying for necessary permit) as well as unintentional (party thought the activity was allowed according to N2000 management plan). Van Gervink says that total area felled is ‘not shocking’ (note: total</p> |

|  |  |  | <p>land area N2000 is 340.000 hectares). Illegal activities or alleged illegal activities are often notified by the public and then followed up by the authorities. Again, one may assume that public attention is a main tool against illegal activities.</p> <p><b>Additional</b><br/> In addition forest contractors generally adhere to the requirements of the so-called Erbo-regulation. The Erbo-regulation is widely adopted by (forest) contractors. ErBo is an voluntary initiative of forest owners and forest contractors jointly to guarantee the quality of forest contractors. The ErBo contributes to the professionalization of the sector, as the ErBo ensures that the business operations of the participants comply with the applicable laws and regulations, but also regulates matters such as safe working conditions, training and adequate care for forests, nature and the environment.</p> <p>Under A1.3 On sites where work is carried out the contractor has access to a working plan. The minimum requirements for the working plan include a Flora and Fauna check as well as information about protected and permanent elements (incl. Nature and cultural heritage sites (Stichting Kwaliteit Bos-, Natuur- en Landschapswerk, 2018, p. 16).</p> <p>Under B4.1 of the Erbo-regulation it is required that the contractor complies with nature legislation. “Objective: The work is carried out with due observance of the due care prescribed by law.” (Stichting Kwaliteit Bos-, Natuur- en Landschapswerk, 2018, p. 28).</p> <p><u>Risk conclusion</u><br/> The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> |

All are obliged to deal carefully with pesticides, if one may reasonably suspect that one's act may endanger humans, animals, plants, soil or water, it is mandatory to omit this act or immediately take measures to avoid, limit or undo the peril.</p> <p>The Wet Natuurbescherming (Nature Conservation Act) protects breeding birds from disturbing activities, such as timber harvesting. On the basis of this Act a Code of Conduct has been produced. It regulates timber harvesting in the birds breeding season. Harvesting in mixed- and hardwood forests is forbidden between March 15 and August 15. Harvesting in softwood forests is only allowed if a bird breeding inventory has shown that no breeding birds are located in the relevant forest stands. (Semi-) Permanent habitats always have to be inventoried before harvesting and protected, such as anthills, dens, nests of bird of prey etc.</p> <p>The development of both forestry and non-forestry infrastructure is regulated in the Spatial Planning Act (Wet Ruimtelijke Ordening). The environmental, social and ecological effects of the construction of forestry and non-forestry infrastructure has to be assessed. If there are possible negative effects a permit has to be obtained.</p> <p>The protection of soil and ground water quality is regulated by the Soils Protection Act (Wet Bodembescherming) and the Soils Protection Decree</p> |

Erbo – Erkenningsregeling bosaannemers 2018 (Foundation Quality for Works in Forest, Nature and landscape, 2018. Recognition scheme for forest contractors 2018)<br/><a href="https://www.skbnl.nl/">https://www.skbnl.nl/</a></p> | <p>(Besluit Bodembescherming). The Soil Protection Act contains the conditions for activities on or in the ground.</p> <p><i>Description of risk</i><br/>The Netherlands has numerous laws, regulations, ordinances and directives designed to regulate environmental values and requirements. There are no statistics available relating to on-site visits by relevant authorities; however on-site visits are known measures of control and planning. If there is an infringement of the law, this is normally pointed out by local communities or local conservation NGOs (source: interviews with Schadenberg and Hekhuizen, 2019.). In addition, due to the awareness of high penalties, there are no known significant environmental conflicts relating to harvesting activities. An expert, Dianne Nijland, the Working Group and an Internet search confirms this conclusion.</p> <p>In addition forest contractors generally adhere to the requirements of the so-called Erbo-regulation. The Erbo-regulation is widely adopted by (forest) contractors. ErBo is an voluntary initiative of forest owners and forest contractors jointly to guarantee the quality of forest contractors. The ErBo contributes to the professionalization of the sector, as the ErBo ensures that the business operations of the participants comply with the applicable laws and regulations, but also regulates matters such as safe working conditions, training and adequate care for forests, nature and the environment.</p> <p>Under B3.1 Environmental legislation as well as sector agreements re environment are complied with (Stichting Kwaliteit Bos-, Natuur- en Landschapswerk, 2018, p. 27).</p> <p>The 2017 Worldwide Governance Indicators compiled by the World Bank show that the Netherlands was in the 98.56 percentile rank for regulatory quality among all countries in the world in 2017 (up from 96.21 in 2012),</p> |

Een analyse van bij de Inspectie</p> | <p><i>Overview of legal requirements</i><br/>Health and safety regarding operations in the forest are set out in the Arbeidsomstandighedenwet (Working Conditions Act), the Arbobesluit (Working Conditions Decree) and the Arboregeling (Working Conditions Regulations). The ILO Code is covered by this legislation. The employer is responsible for safe working conditions and the prevention of disease and disability. The employer has to conduct risk inventories and assessments. He/she is responsible to supply safety equipment and the usage of it. He/she also has to take care of proper training and the use of adequate working methods in the forest. These regulations are also relevant for volunteers. Employees also have responsibilities. They are obliged, for example, to follow the relevant safety conditions that apply within the workplace.</p> <p>The use of chemicals is covered in the Wet gewasbeschermingsmiddelen en biociden (Pesticides and biocides Act). This act regulates the trade in and use of biocidal products. Only products authorized by the Board for the Authorisation of Plant Protection Products and Biocides can be used. Every authorized product has a use prescription to be followed by the forest owner.</p> |

Den Haag, 2016</a></u><br/><u><a href="#">Complaints and accidents working conditions. An analysis of complaints and accidents at work reported to the SZW Inspectorate for the years 2012-2015 in the field of healthy and safe working</a></u></p> <p><u><a href="https://www.inspectieszw.nl/publicaties/rapporten/2017/03/20/klachten-en-ongevallen-arbeidsomstandigheden-2016">https://www.inspectieszw.nl/publicaties/rapporten/2017/03/20/klachten-en-ongevallen-arbeidsomstandigheden-2016</a></u></p> <p>The Worldwide Governance Indicators (WGI) project 1996-2017<br/><u><a href="http://info.worldbank.org/governance/wgi/index.aspx#reports">http://info.worldbank.org/governance/wgi/index.aspx#reports</a></u></p> <p>Stichting Kwaliteit Bos-, Natuur- en Landschapswerk, 2018. Erbo – Erkenningsregeling bosaannemers 2018 (Foundation Quality for Works in Forest, Nature and landscape, 2018. Recognition scheme for forest contractors 2018)<br/><u><a href="https://www.skbnl.nl/">https://www.skbnl.nl/</a></u></p> | <p><u><i>Description of risk</i></u><br/>Statistics on the forest sector (Inspectie SZW, 2016) show 0 reported severe or lethal accidents in 2015, 1 in 2014 and 1 in 2013. One accident in the forestry sector is equivalent to 71 accidents on every 100.000 employees (note: this latter figure is produced to enable comparison with other sectors; in reality only 1400 persons are employed in the forestry sector, source: Inspectie SZW, 2016)</p> <p>The so-called Erbo-regulation is widely adopted by (forest) contractors. ErBo is an voluntary initiative of forest owners and forest contractors jointly to guarantee the quality of forest contractors. The ErBo contributes to the professionalization of the sector, as the ErBo ensures that the business operations of the participants comply with the applicable laws and regulations, but also regulates matters such as safe working conditions, training and adequate care for forests, nature and the environment. Safe working conditions are being dealt with under A3 (Safety own personnel) (Stichting Kwaliteit Bos-, Natuur- en Landschapswerk, 2018, p. 21-24).</p> <p>The 2017 Worldwide Governance Indicators compiled by the World Bank (<u><a href="http://info.worldbank.org/governance/wgi/index.aspx#reports">http://info.worldbank.org/governance/wgi/index.aspx#reports</a></u>) show that the Netherlands was in the 98.56 percentile rank for regulatory quality among all countries in the world in 2017 (up from 96.21 in 2012), the 97.12 percentile rank for rule of law (slightly down from 97.65), This indicates that monitoring compliance of legislation is at a high level in the Netherlands.</p> <p><u><i>Risk conclusion</i></u><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> |

This is further elaborated in:</p> <ul style="list-style-type: none"> <li>- Act on Board for the Protection of Human Rights (Wet College voor de Rechten van de Mens)</li> <li>- Equal Treatment Act (Algemene wet gelijke behandeling)</li> <li>- Equal treatment on the grounds of disability or chronic illness Act (Wet gelijke behandeling op grond van handicap of chronische ziekte)</li> <li>- Equal Treatment in Employment Act (Wet gelijke behandeling op grond van leeftijd bij arbeid)</li> <li>- General Act on Equality and Equal Treatment of men (Wet gelijke behandeling van mannen en vrouwen)</li> </ul> <p><i>Description of risk</i><br/>The Netherlands scores a 1 (scale 1 to 7, 1 being the best) on freedom rating, civil liberties and political rights according to the Freedom House. Legislation and control mechanisms are in place and are constantly adapted.</p> <p>The Inspection Social Affairs and Employment (Inspectie SZW) recognizes that there is high risk of illegal labour in the so-called agricultural and green sector (this includes the forestry sector) but has identified that the risk is high in sub-sectors <i>not</i> including the forestry sector: cultivation of asparagus, strawberries, vegetables, trees and bulbs. (Inspectie SZW, 2017).<br/>Note: Trees means tree nurseries mainly producing for 'public green': lane trees, park trees etc. It is not considered to be part of the forestry sector.</p> <p>The European Migration Network has carried out a study on illegal work the EU. The main conclusion is that the issue of illegal work in the Netherlands is relatively small. The shadow economy is small compared to the European average. About 9% of the Dutch economy consists of a shadow economy in 2015. The average of European countries is at 18%. (EMN, April 2017)</p> |

April 2017)</p> | <p>The so-called Erbo-regulation is widely adopted by contractors.</p> <p>The ErBo is an voluntary initiative of forest owners and forest contractors jointly to guarantee the quality of forest contractors. The ErBo contributes to the professionalization of the sector, as the ErBo ensures that the business operations of the participants comply with the applicable laws and regulations, but also regulates matters such as safe working conditions, training and adequate care for forests, nature and the environment.</p> <p>ERBO also addresses obligatory insurances as the certificate holder should uphold the Working Conditions Act.<br/> ERBO also addresses certificates of competence as it requires demonstrable competence and retraining to keep competence up to date.<br/> Erbo requires payment of social and income taxes through the demand to fulfil tax obligations. (Source: Recognition scheme for forest contractors 2018)<br/> CH's are audited annually. Currently the scheme has 165 CH's. (May 2019) or over 90% of the (sub)contractors that perform forest work. In 2018 8 CH's were temporarily suspended. <u>The ERBO scheme covers the majority of work in the forests</u> as almost all forest owners require ERBO-certified contractors. The umbrella organization for forest companies AVIH (forest contractors, timber traders) requires ERBO-certification where relevant. ERBO certification does not replace legislation but it provides a good indication of compliance to relevant legislation. (source: Alicia van der Grift)</p> <p>The 2017 Worldwide Governance Indicators compiled by the World Bank show that the Netherlands was in the 98.56 percentile rank for regulatory quality among all countries in the world in 2017 (up from 96.21 in 2012), the 97.12 percentile rank for rule of law (slightly down from 97.65),</p> |

Most transport trips by road and water not over 300 km)</p> <p>Transparency International Corruption Perception Index 2018,<br/><a href="https://www.transparency.org/cpi2018">https://www.transparency.org/cpi2018</a></p> | <p><i>Overview of legal requirements</i><br/>Ninety percent of the goods that are loaded in the Netherlands in either a road vehicle, an inland vessel or a train go no further than 300 kilometers. The shorter the distance, the greater the share of road transport by Dutch vehicles. Sea containers and bulk goods such as sand, iron ore, diesel and coal are mainly transported via inland shipping and rail (source: CBS, 2014).</p> <p>Transport is regulated in the Road Transport Goods Law (Wet Wegvervoer Goederen). Transport always needs to be accompanied by a valid bill of lading: It is forbidden to carry out professional transport if no bill of lading has been drawn up with regard to that transport (Road Transport Goods Law, Article 2,13)</p> <p>The consignor and transporter lay down the transport agreement in the consignment note; this bill of lading proves the (verbally) concluded agreement. If entered correctly, the bill of lading clarifies sender, transporter and consignee. The bill of lading also contains other important agreements, such as: what is the load (type of goods, quantity, weight, changing pallets yes / no); date of receipt and delivery; temperature with conditioned transport; COD instructions; etcetera. |  |  | <p>Stichting Vervoeradres. Juridische informatie voor de logistieke praktijk <a href="http://www.sva.nl">www.sva.nl</a> (retrieved June 6, 2019) (Foundation Transport Adress. Legal information for logistic practises)</p> <p>Expert Interview Maarten Willemen. 18-2-2019. Algemene Vereniging Inlands Hout (General Association for Native Timber) (AVIH)</p> | <p>Cargo Bill Regulation Article 15: The following indications are stated on the bill of lading:</p> <ul style="list-style-type: none"> <li>a. the name and address of the sender;</li> <li>b. the name and address of the carrier;</li> <li>c. the name and address of the addressee;</li> <li>d. the common indication of the nature of the goods;</li> <li>e. the gross weight or otherwise stated quantity of the goods.</li> </ul> <p>The Regulation is controlled by Inspectie Leefomgeving en Transport (ILT) (The Human Environment and Transport Inspectorate)</p> <p><i>Description of risk</i><br/>Corruption and/or fraud with transport documents is not an issue in the Dutch wood transporting sector. Maarten Willemen (AVIH), who has extensive experience in timber trade states that the different parties involved in timber trade (transport) (e.g. supplier and customer) keep a close eye at each other thereby preventing false claims in bills of lading. Willemen calls a system of 'counter balance' and an adequate mechanism against fraud. Willemen does not know of any cases of fraud.</p> <p>The Working Group is also taking the following information into consideration:</p> <p>The Netherlands ranks 8 in the CPI 2018 with a score of 82, so corruption is low in the Netherlands.</p> <p>Further internet search did not reveal any cases of fraud and the Working Group confirmed this conclusion</p> <p><i>Risk conclusion</i><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> |

Juridische informatie voor de logistieke praktijk <a href="http://www.sva.nl">www.sva.nl</a> (retrieved June 6, 2019) (Foundation Transport Adress. Legal information for logistic practises)</p> <p>Transparency International Corruption Perception Index 2018, <a href="https://www.transparency.org/cpi2018">https://www.transparency.org/cpi2018</a></p> | <p><i>Overview of legal requirements</i><br/> Ninety percent of the goods that are loaded in the Netherlands in either a road vehicle, an inland vessel or a train go no further than 300 kilometers. The shorter the distance, the greater the share of road transport by Dutch vehicles. Sea containers and bulk goods such as sand, iron ore, diesel and coal are mainly transported via inland shipping and rail (source: CBS, 2014).</p> <p>Transport is regulated in the <i>Road Transport Goods Law</i> (Wet Wegvervoer Goederen). Transport always needs to be accompanied by a valid Bill of Laden: It is forbidden to carry out professional transport if no bill of lading has been drawn up with regard to that transport (Road Transport Goods Law, Article 2,13)</p> <p>The consignor and transporter lay down the transport agreement in the consignment note; this bill of laden proves the (verbally) concluded agreement. If entered correctly, the bill of laden clarifies sender, transporter and consignee. The bill of laden also contains other important agreements, such as: what is the load (type of goods, quantity, weight, changing pallets yes / no); date of receipt and delivery; temperature with conditioned transport; COD instructions; etcetera. (source: SVA)</p> <p>Cargo Bill Regulation Article 15: The following indications are stated on the bill of lading:</p> <ol style="list-style-type: none"> <li>the name and address of the sender;</li> <li>the name and address of the carrier;</li> <li>the name and address of the addressee;</li> <li>the common indication of the nature of the goods;</li> <li>the gross weight or otherwise stated quantity of the goods.</li> </ol> |

Maarten Willemen (AVIH), who has extensive experience in timber trade states that the different parties involved in timber trade (transport) (e.g. supplier and customer) keep a close eye at each other thereby preventing false claims in bills of lading. Willemen calls a system of 'counter balance' and an adequate mechanism against fraud. Willemen does not know of any cases of fraud.</p> <p>The Working Group is also taking the following information into consideration:</p> <p>The Netherlands ranks 8 in the CPI 2018 with a score of 82, so corruption is low in the Netherlands.</p> <p>Further internet search did not reveal any cases of fraud and the Working Group confirmed this conclusion</p> <p><i>Risk conclusion</i><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> <p>For this indicator the area under assessment is determined to be 'low risk'.</p> |

The guidelines enable the Netherlands to automatically exchange tax-related financial accounting information with other EU member states and non-EU countries.</p> <p>This international tax standard, developed by the OECD and supported by the UN and the G20, provides for full exchange of information on request in relation to all tax matters – without regard to domestic tax interest requirements or bank secrecy for tax purposes. For instance: financial institutions are obliged to determine the tax residence or country of residence of their customers. Currently all 30 OECD member countries, including the Netherlands have endorsed and agreed to implement the international tax standard. Furthermore, all offshore financial centres accept the standard.</p> <p>In the Netherlands the Common Reporting Standard is incorporated in national legislation: Law execution Common Reporting Standard 2015.</p> <p>The Netherlands has exchange of information relationships with over 100 jurisdictions through 102 Double Taxation Conventions (January 2019) and 33 Tax Information Exchange Agreements including with some of the best-known tax havens. The convention is legally binding.</p> <p>If the Netherlands has not concluded a tax treaty with the country in question, the Decree on the Avoidance of Double Taxing, 2001 applies.</p> <p><i>Description of risk</i></p> |

|  |  | <p>Transparency International<br/>Corruption Perception Index 2018,<br/><a href="https://www.transparency.org/cpi2018">https://www.transparency.org/cpi2018</a></p> <p>The Worldwide Governance Indicators (WGI) project 1996-2017<br/><a href="http://info.worldbank.org/governance/wgi/index.aspx#reports">http://info.worldbank.org/governance/wgi/index.aspx#reports</a></p> <p>Jaarverslag 2018 Staatsbosbeheer<br/><a href="https://www.staatsbosbeheer.nl/-/media/07-over-staatsbosbeheer/jaarverslag/jaarverslag-2018.pdf">https://www.staatsbosbeheer.nl/-/media/07-over-staatsbosbeheer/jaarverslag/jaarverslag-2018.pdf</a><br/>(Annual Report 2018 State Forestry Service)</p> | <p>Due to the above situation, measures have been established to ensure that offshore trading is avoided. The most important measures are: an earnings stripping scheme that limits the deductibility of interest and measures for controlled foreign companies ("CFCs"). (source: PWC 2018)</p> <p>The corruption level in the Netherlands is considered low; refer to the Transparency International Corruption Perceptions Index 2018 of 82 (higher than the threshold of 50).</p> <p>The Netherlands ranks high on the Worldwide Governance Indicators with 'rule of law' being 97.12 and 'control of corruption' at 94.17.</p> <p>These figures indicate that monitoring compliance of legislation is at a high level in the Netherlands.</p> <p>The Working Group also takes into consideration that the forestry sector in the Netherlands is very small, producing relatively low volumes of timber sold for relatively low prices. The Staatsbosbeheer (State Forestry Service) which harvests around 1/3 of total timber volume in the Netherlands had a total timber sales income of 27,4 million euro in 2018 or 83 euro per m3 (Jaarverslag 2018 Staatsbosbeheer). Therefore, the estimated annual timber sales income for the Netherlands is around 80 million euro, which is a fraction of Gross Domestic Product (725 billion in 2017). Based on the low volume and low prices the Working Group finds a highly unlikely that offshore trading would be a meaningful risk.</p> <p><u><i>Risk conclusion</i></u><br/>The risk threshold (1) applies: Identified laws are upheld. Cases where laws are violated are efficiently followed up via preventive actions taken by the authorities.</p> |

All requirements of the Community Customs Code are integrated in the Customs Manual. The Customs Code is carried out by the Customs Office, part of Ministry of Finance.</p> <p>For trade within EU no import or export licenses are required ('internal market': Since the Maastricht Treaty (1992), goods are no longer subject to checks when crossing the internal borders of the EU and the EU forms a single territory).</p> <p>Custom authorities are situated at every airport and harbor.</p> <p>For (international) transport (trade) the requirements laid down in Cargo Bill Regulation are in place. Cargo Bill Regulation Article 15: The following indications are stated on the bill of lading:<br/>a. the name and address of the sender;<br/>b. the name and address of the carrier;<br/>c. the name and address of the addressee;<br/>d. the common indication of the nature of the goods;<br/>e. the gross weight or otherwise stated quantity of the goods.</p> <p>The Regulation is controlled by Inspectie Leefomgeving en Transport (ILT).</p> <p>Export of domestic wood occurs as high and low grade roundwood, wood products and biomass. The Customs Office carries out checks on imports and exports, including verification of documents and EUTR, FLEGT and phytosanitary requirements.</p> |

|  |  |  | <p><u>Description of risk</u></p> <p>The Netherlands is part of the EU internal market. Export of Dutch wood to destinations outside the EU internal market is very limited.</p> <p>Jan Oldenburger at Probos (an expert consultancy on forestry) indicates that small volumes of roundwood produced in the Netherlands (in Netherlands forests that is) are exported to destinations outside the EU (China, India). This is around 1500 – 2500 m3 per year. In addition, an estimated 18.000 m3 of sawn wood is exported to destinations outside the EU but Oldenburger assumes that most of the timber that occurs in official statistics does not originate from Dutch forests but rather is part of a trade flow going through the Rotterdam harbor. There are no statistics so the figures are based on best professional judgement.</p> <p>The Netherlands ranks high on the Worldwide Governance Indicators with 'rule of law' being 97.12 and 'control of corruption' at 94.17.</p> <p>These figures indicate that monitoring compliance of legislation is at a high level in the Netherlands.</p> <p>The chances of breaking custom regulations outside the EU in relation to domestically produced timber are therefore very small.</p> <p>The Working Group states that there are no known examples.</p> <p>At present there are no documents required for Customs clearance within the EU. Customs clearance for and from locations outside the EU require the elements of the Cargo Bill Regulation, as outlined previously. There are no indications or records of any significant violations that would qualify for specified risk.</p> |

Met het oog op risico's (Eyeing Risks): <a href="https://www.nvwa.nl/nieuws-en-media/nieuws/2017/06/21/jaarverslag-2016-nvwa-een-scherp-oog-voor-risico%E2%80%99s">https://www.nvwa.nl/nieuws-en-media/nieuws/2017/06/21/jaarverslag-2016-nvwa-een-scherp-oog-voor-risico%E2%80%99s</a></p> <p>Expert Interview: Mark van Benthem, EUTR and sustainable timber expert, Stichting Probos (Probos is independent consultant on forestry and forest products)</p> <p>Email correspondence with coordinator EUTR at the NVWA (Meriam Wortel, 05-02-2019)</p> | <p>Implementing European Timber Regulation) of 7 December 2012. The Dutch Food Safety Authority (NVWA) is responsible for ensuring that the EUTR is properly applied by operators (Competent authority).</p> <p><i>Description of risk</i><br/>The Biennial report of the Dutch Food &amp; Safety Authority shows that between March 2013-February 2015 98 inspections have been executed. 24 trading companies (not Dutch wood) have been given a notices of remedial actions. The rechecks showed that all companies have solved the problem.</p> <p>Mark van Benthem, EUTR and sustainable timber expert, Stichting Probos stated that due diligence/due care on Dutch wood is not a problem, since the wood chains are short and clear. Besides, administration is rather simple with felling reports and bill of lading (short supply chain).</p> <p>Meriam Wortel, coordinator EUTR at competent authority NVWA (email 05-02-2019) states that NVWA in 2013-2014 has carried out checks at approx. 10 companies that put timber from Dutch forests on the EU market (operators) and that no law violations were found: 'We see low risk. Forest management and law enforcement are well applied in the Netherlands'. Meriam Wortel estimates that there are 100 companies involved in this timber trade (that is: the trade in timber from Dutch forests).</p> <p><i>Risk conclusion</i><br/>The risk threshold (1) applies. Identified laws are upheld. Cases where law/regulations are violated are efficiently followed up via preventive actions taken by the authorities and/or by the relevant entities.<br/>The risk of this indicator is determined to be LOW.</p> |

## 5.2 CONTROLLED WOOD CATEGORY 2: WOOD HARVESTED IN VIOLATION OF TRADITIONAL AND HUMAN RIGHTS

| Indicator                                                                                                                                                             | Sources of information       | Functional Scale | Risk designation and determination                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2.1. The forest sector is not associated with violent armed conflict, including that which threatens national or regional security and/or linked to military control. | See detailed analysis below. | <b>Country</b>   | No information was found about the Netherlands as being a source of conflict timber and the forest sector is not associated with any violent armed conflict.<br>All 'low risk' thresholds are met (1, 2, 3, 4 and 5) and there is no other evidence of 'specified risk'. Therefore, the risk designation for this indicator is 'low risk'.                                                                                                                                                                                                                                                                                                                                                                      |
| 2.2. Labor rights are respected including rights as specified in ILO Fundamental Principles and Rights at work                                                        | See detailed analysis below. | <b>Country</b>   | No information was found that proved that labour rights as well as the ILO Fundamental Principles and Rights at work are at risk. Applicable legislation for the area under assessment covers the key principles recognized in the ILO Fundamental Principles and Rights at work (which are recognized as: freedom of association and right to collective bargaining; elimination of forced and compulsory labor; eliminations of discrimination in respect of employment and occupation; and effective abolition of child labor), AND other available evidence does not challenge a 'low risk' designation.<br>Thresholds 10 and 12 are met. Therefore, the risk designation for this indicator is 'low risk'. |
| 2.3. The rights of Indigenous and Traditional Peoples are upheld.                                                                                                     | See detailed analysis below. |                  | There is no evidence leading to a conclusion of presence of indigenous and/or traditional peoples in the area under assessment.<br>Thresholds 16 and 21 are met. Therefore, the risk designation for this indicator is 'low risk'.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

### General/contextual information

The table below gives an overview of more sources on governance in the Netherlands..

| Sources of information                                                                           | Evidence                                                                                   | Scale of risk assessment |

| <p>Human Rights Watch: <a href="http://www.hrw.org">http://www.hrw.org</a></p>                                                                | <p><u>World Report 2017</u><br/> <a href="https://www.hrw.org/sites/default/files/world_report_download/wr2017-web.pdf">https://www.hrw.org/sites/default/files/world_report_download/wr2017-web.pdf</a></p> <p>“In February, the government expanded the list of safe third countries for asylum seekers. Countries from countries deemed safe are presumed not to need intercountry protection and are subject to accelerated procedures, raising concerns about the quality of individual examination of asylum claims. In September 2016, the country’s highest administrative court affirmed the legality of Albania’s designation as a safe country of origin.</p> <p>The Dutch government continued to offer support that is limited in duration and scope to rejected asylum seekers, with assistance contingent on their cooperation with removal from the country. In February, several UN special rapporteurs urged the Dutch government to provide emergency assistance to rejected asylum seekers. Refugee rights groups criticized Dutch authorities over longer waits for asylum determinations and family reunification procedures.</p> <p>At the start of 2016, NGOs reported threats and discrimination against LGBT asylum seekers at asylum facilities, and a Dutch independent monitoring body, the Dutch Board for Protection of Human Rights, found in February that LGBT asylum seekers at a large facility face discrimination.</p> <p>In May, the Netherlands enacted a law allowing authorities to strip Dutch citizenship from dual countries as young as 16 if they determine that they have joined or fought abroad with a terrorist group and pose an “immediate threat” to country security. No court conviction is required. Those whose Dutch citizenship is revoked have only four weeks to appeal.</p> <p>In January, the Netherlands ratified the UN Convention on the Rights of Persons with Disabilities.”</p> | <p>Country</p> |

| <p>Chatham House Illegal Logging Indicators Country Report Card<br/> <a href="http://indicators.chathamhouse.org/explore-the-data">http://indicators.chathamhouse.org/explore-the-data</a></p>                                                                                                                                                                                                                              | <p>2013 Assessment Findings<br/> <a href="https://indicators.chathamhouse.org/explore-the-data/netherlands">https://indicators.chathamhouse.org/explore-the-data/netherlands</a></p> <p>“The assessment indicates that the Netherlands has continued to show a strong response to the problem of illegal logging and related trade. The government played an active part in the development of the EU’s FLEGT Action Plan, and has been supporting the negotiation and implementation of voluntary partnership agreements with producer countries.</p> <p>The government has also been promoting the production and consumption of sustainable timber. It has a comprehensive procurement policy, established the Sustainable Trade Initiative and helped to launch the European Sustainable Tropical Timber Coalition. As a result of these government actions as well as engagement by the private sector, there is a high proportion of certified wood-based products on the Dutch market as well as a large number of companies with chain-of-custody certification. A high level of media coverage on the issue of illegal logging also indicates that there is widespread awareness of this issue.</p> <p>This response is thought to be partly responsible for the decline in imports into the Netherlands of timber-sector products likely to be illegal, currently estimated to comprise two per cent of the total.”</p> | <p>Country</p> |
| <p>Transparency Intercountry Corruption Perceptions Index<br/> <a href="https://www.transparency.org/news/feature/corruption_perceptions_index_2017">https://www.transparency.org/news/feature/corruption_perceptions_index_2017</a></p>                                                                                                                                                                                    | <p>The Netherlands scores 82 points on the Corruption Perceptions Index 2017 on a scale from 0 (highly corrupt) to 100 (very clean). The Netherlands ranks 8th out of 180 with rank no. 1 being the most clean country.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Country</p> |
| <p>Amnesty Intercountry Annual Report: The state of the world’s human rights -information on key human rights issues, including: freedom of expression; intercountry justice; corporate accountability; the death penalty; and reproductive rights<br/> <a href="https://www.amnesty.org/en/latest/research/2016/02/annual-report-201516/">https://www.amnesty.org/en/latest/research/2016/02/annual-report-201516/</a></p> | <p>Amnesty International Annual Report 2015/2016<br/> <b>“REFUGEES’ AND MIGRANTS’ RIGHTS</b><br/> <b>Immigration detention</b><br/> Solitary confinement continued to be used in immigration detention centres, both as a means of control and as a punitive measure. In March, body scan equipment was introduced in detention centres, making strip searches of detained migrants largely unnecessary. In September the government tabled a draft law regulating immigration detention. The law mentions the need to consider alternatives to detention. However, it includes provisions that would, in practice, likely lead to harsher conditions for detained irregular migrants and asylum-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Country</p> |

seekers. The law also fails to establish an effective mechanism to prevent the detention of vulnerable groups, and the authorities' power to use solitary confinement remain unchanged.

**Economic, social and cultural rights**

The government failed to implement the recommendation by the European Committee of Social Rights that all people, including irregular migrants, should unconditionally have access to shelter and basic necessities. In April, the government put forward a proposal to establish shelters in a limited number of municipalities, but make accommodation there dependent on the willingness of the irregular migrant to cooperate in their deportation.

***Refoulement***

The government continued its attempts to deport rejected asylum-seekers to southern and central Somalia, including – under certain circumstances – to al-Shabaab-controlled areas, against guidelines issued by UNHCR, the UN refugee agency. In August, the government decided to temporarily halt forced returns of Uighurs to China, in anticipation of a new guidance report.

In May, Mathieu Ngudjolo, a former Congolese militia leader, was returned to the

Democratic Republic of the Congo despite alleged fears for his safety, after the Council

of State rejected his request for asylum. Mathieu Ngudjolo was acquitted by the ICC of

war crimes and crimes against humanity, a decision confirmed on appeal on 27 February.

**DISCRIMINATION – POLICING**

In response to concerns about ethnic profiling by the police, the government committed to undertaking measures focused on awareness raising and training of police officers. However, it still did not introduce clear guidelines to limit widespread stop-and search powers that increase the risk of ethnic profiling, or institute systematic monitoring of stop-and-search operations.

**RIGHT TO PRIVACY**

In July the government published proposals to amend the powers of the intelligence and

| <p>Fund for Peace - Fragile States Index - the Fund for Peace is a US-based non-profit research and educational organization that works to prevent violent conflict and promote security. The Fragile States Index is an annual ranking, first published in 2005 with the name Failed States Index, of 177 nations based on their levels of stability and capacity<br/> <a href="http://fsi.fundforpeace.org/">http://fsi.fundforpeace.org/</a></p>                                                                                                                             | <p><u>Fragile States Index 2016</u></p> <p>The Netherlands is ranked 166 out of 178 countries on the Fragile States Index 2016. (No. 1 being the most failed state). This ranks The Netherlands in the category 'Sustainable'.</p> | <p>Country</p> |
| <p>The Global Peace Index. Published by the Institute for Economics &amp; Peace, This index is the world's leading measure of country peacefulness. It ranks 162 nations according to their absence of violence. It's made up of 23 indicators, ranging from a nation's level of military expenditure to its relations with neighboring countries and the level of respect for human rights.<br/> <a href="http://visionofhumanity.org/app/uploads/2018/06/Global-Peace-Index-2018-2.pdf">http://visionofhumanity.org/app/uploads/2018/06/Global-Peace-Index-2018-2.pdf</a></p> | <p><u>2018 Global Peace Index</u></p> <p>The State of Peace in The Netherlands is labeled 'High' with The Netherlands ranking number 23 out of 163 countries (no. 1 being the most peaceful country).</p>                          | <p>Country</p> |

### Detailed analysis

**Indicator 2.1. The forest sector is not associated with violent armed conflict, including that which threatens country or regional security and/or linked to military control.**

#### Guidance

- Is the country covered by a UN security ban on exporting timber?
- Is the country covered by any other intercountry ban on timber export?
- Are there individuals or entities involved in the forest sector that are facing UN sanctions?

| <b>Conclusion on indicator 2.1:</b><br>No information was found on The Netherlands as a source of conflict timber and the forest sector is not associated with any violent armed conflict. There is no UN security ban, other ban or UN sanction.<br><br><b>The following low risk thresholds apply:</b><br>(1) The area under assessment is not a source of conflict timber <sup>5</sup> ; AND<br>(2) The country is not covered by a UN security ban on exporting timber; AND<br>(3) The country is not covered by any other intercountry ban on timber export; AND<br>(4) Operators in the area under assessment are not involved in conflict timber supply/trade; AND<br>(5) Other available evidence does not challenge 'low risk' designation. |                                                                                                                                        | Country | Low risk |

## Indicator 2.2. Labour rights are respected including rights as specified in ILO Fundamental Principles and Rights at work.

### Guidance

- Are the social rights covered by the relevant legislation and enforced in the country or area concerned? (refer to category 1)
- Are rights like freedom of association and collective bargaining upheld?
- Is there evidence confirming absence of compulsory and/or forced labour?

<sup>5</sup> “Conflict timber” limited to include “timber that has been traded at some point in the chain of custody by armed groups, be they rebel factions or regular soldiers, or by a civilian administration involved in armed conflict or its representatives, either to perpetuate conflict or take advantage of conflict situations for personal gain - conflict timber is not necessarily illegal. Please refer to FSC-PRO-60-002a V1-0.

- Is there evidence confirming absence of discrimination in respect of employment and/or occupation, and/or gender?
- Is there evidence confirming absence of child labour?
- Is the country signatory to the relevant ILO Conventions?
- Is there evidence that any groups (including women) feel adequately protected related to the rights mentioned above?
- Are any violations of labour rights limited to specific sectors?

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                               |                                     |

|  | <p>“The Committee notes the observations on the Government’s report by the Confederation of Netherlands Industry and Employers (VNO–NCW) and the Netherlands Trade Union Confederation (FNV).</p> <p><b>Assessment of the gender pay gap.</b> The Committee recalls that various studies and research have been undertaken on differences in remuneration and the underlying causes of the uncorrected gender pay gap, which remained relatively high. The Committee notes the Government’s indication that the information provided by Statistics Netherlands on the uncorrected difference is based on the gross hourly wage and that the corrected difference is calculated on a number of characteristics such as gender, age and education. This resulted in an uncorrected gender wage gap in 2010 of 13 per cent in government and 20 per cent in industry; after correction a difference of 7 and 8 per cent remained in industry. The Government considers, however, that a difference after correction does not mean that discrimination exists as some differences cannot be measured, such as those related to ambition. The FNV points out, however, in this regard that the difficulties for women to be promoted to better paid positions cannot be explained only by their assumed lack of ambition, but rather indicate the existence of a glass ceiling.</p> <p><b>Articles 2 and 3 of the Convention. Wage setting and determining value.</b> The Committee recalls its previous comments in which it addressed issues relating to the scope of comparison of work of equal value beyond the level of the same company or enterprise, the promotion of the use of objective job evaluation systems free from gender bias, the evolution of pay structures in the public sector, and measures to monitor the application of the principle of equal remuneration for men and women for work of equal value in the context of flexible pay systems, performance pay and long pay scales. The Committee notes the general reply of the Government that it will not take any further action before the Social and Economic Council (SER) has published its advice on discrimination in the labour market. In addition, the Committee notes that, with respect to measures to allow for appropriate comparison beyond enterprise level, the VNO–NCW expresses the view that the objective to eliminate wage discrimination between men and women should not be extended beyond company level as different companies and different sectors have different wage levels and structures, based on their competitiveness and labour market position. The Committee also notes that the Government provides only general information on the number</p> |  |  |

|  | <p>of cases on wage discrimination addressed by the courts in 2011 and by the Equal Treatment Commission (now incorporated in the Institute for Human Rights (CRM)) in 2012 (ten and four, respectively). The Committee wishes to reiterate that the reach of comparison between jobs performed by women and men should be as wide as possible, in the context of the level at which wage policies, systems and structures are coordinated. Where women are more heavily concentrated in certain sectors or occupations, there is a risk that the possibilities for comparison at the enterprise or establishment will be insufficient; the possibility to look outside an enterprise for appropriate comparisons should therefore exist, where necessary.”</p> <p>C105<br/>No ILO observations available (no issues). Inherent requirements of the job.</b> The Committee notes that section 5(2)(a) to (c) of the Equal Treatment Act allows institutions founded on religious, ideological or political principles, as well as private educational establishments, to impose requirements which, having regard to the purpose of the institution, are necessary for the fulfilment of the duty attached to the post, provided that such requirements do not lead to discrimination on the sole grounds of political opinion, race, sex, country, heterosexual or homosexual orientation or civil status. The Committee notes the Government’s statement that “new officers of civil status who are conscientious objectors would not be appointed.” The Committee recalls that FVN had previously expressed concern that lesbian, gay, bisexual and transgender workers in these institutions would continue to be vulnerable to discriminatory treatment under section 5(2)(a).</p> | <p>Country</p> <p>Country</p> | <p>Low risk on forced labour</p> <p>Specified risk on discrimination of LGBT</p> <p>Low risk on discrimination of</p> |

|                                                                                                                                                                                                             | <p><b>Equality between men and women.</b> The Committee recalls the differences in the employment rates of men and women and the country context in which the overall majority of male workers continue to work full time while female workers usually work part time (84 per cent of the male workers are employed more than 35 hours a week compared to 29 per cent of women). The Committee notes the reply of the Government that the participation rate of female workers is among the highest in Europe while at the same time a large proportion of this group work only part time. The Government nonetheless considers that the trend is positive and younger generations of female workers tend to work more hours, also after children are born. The Committee notes that the FNV disagrees with the Government's analysis and considers that the substantial reduction in government subsidies for childcare has greatly increased the costs of formal childcare facilities for many parents. According to the FNV, the Government's investment in full day-care arrangements for children is lagging behind, the increase in the participation of women in the labour market and the number of working hours of women working part time stagnating and the number of working hours for single parents decreasing."</p> <p>C138<br/>No ILO observations available (no issues). | Office of the United Nations High Commissioner for Human Rights (OHCHR), Committee on the Elimination of Discrimination against Women<br><a href="http://tbinternet.ohchr.org/_layouts/treatybodyexternal/Download.aspx?symbolno=CEDAW%2fC%2fNLD%2fCO%2f6&amp;Lang=en">http://tbinternet.ohchr.org/_layouts/treatybodyexternal/Download.aspx?symbolno=CEDAW%2fC%2fNLD%2fCO%2f6&amp;Lang=en</a> | Committee on the Elimination of Discrimination against Women<br><br>“Concluding observations on the sixth periodic report of the Netherlands<br><br>C.Principal areas of concern and recommendations<br><br>15.The Committee welcomes the State party’s efforts to ensure coordination among the various entities of its country machinery for the advancement of women and to promote cooperation with non-governmental organisations in the area of women’s rights. However, the Committee is concerned that:<br><br>(a) No unified strategy and policy for the implementation of the provisions of the Convention has been adopted and that most policies are gender-neutral;<br><br>17. The Committee is concerned by the potential negative impact of a shift in the State party from institutional funding of women’s non-governmental organizations to project subsidies, which has weakened women’s non-governmental organizations, including those of black and migrant women. | Country | Specified risk for discrimination of women |

**Temporary special measures**

19. The Committee commends the State party for the adoption of amendments to Civil Code Book 2 in 2013, which set out a minimum target of 30 per cent for women's representation on management and supervisory boards of large companies. Nevertheless, the Committee is concerned that temporary special measures have not been adopted in order to accelerate *de facto* equality between women and men in other areas covered by the Convention, in particular with regard to education and women's participation in political and public life.

**Stereotypes and harmful practices**

21 The Committee welcomes the State party's efforts to combat discriminatory gender stereotypes and harmful practices such as female genital mutilation and crimes in the name of so-called honour, as well as the adoption of the Forced Marriages (Countermeasures) Act, which entered into force in December 2015. The Committee is, however, concerned that:

(a) Discriminatory stereotypes concerning the roles and responsibilities of women and men in the family and in society persist in the State party;

(b) The media and the advertising sector continue to convey stereotyped and sexualized images of women and the self-regulation of the media including under the Advertising Code Foundation does not sufficiently address this issue;

(c) Discriminatory stereotypes and hate speech target Muslim, migrant and asylum seeking women in the State party;

(d) Women and girls continue to be risk of female genital mutilation, forced marriages and crimes in the name of so-called honour; and

(e) Medically irreversible sex-assignment surgery and other treatments are performed on intersex children.

**Gender-based violence against women**

23. The Committee commends the State party on its efforts to address gender-based violence against women such as the adoption of the Social Support Act (2015) which broadened the concept of social support to include safety in the domestic setting and the ratification of the Council of Europe Convention on Preventing and Combating Violence against Women and Domestic Violence (the Istanbul Convention) in 2015. However, the Committee remains concerned at:

(a) The high number of women who are victims of domestic violence, particularly partner violence;

(b) Information that the recidivism rate for perpetrators of domestic violence who had been subjected to a domestic exclusion order amounts to 29 per cent, with 24.6 per cent of cases considered as serious and 5.8 per cent as extremely serious;

(d) The lack of data on the impact of the broadening of the Social Support Act, 2015 to include safety in domestic setting as well as the merger of child abuse and domestic violence into safe home organisations;

(e) The lack of information on the impact of measures taken following a change in approach to have a gender-neutral police service that handles gender-based violence; and

(f) Reports of hate crimes against lesbian, bisexual, transgender and intersex women.

**Trafficking and exploitation of prostitution**

27. The Committee welcomes the sharp increase in the prosecution of cases of trafficking in persons partly due to the use of specialised prosecutors and criminal investigators. The Committee also commends the State party that since January 2013, all cases of trafficking in persons are heard by specialised judges in order to build their capacity and expertise on trafficking. However, the Committee is concerned at the prevalence of trafficking of women and girls for purposes of sexual exploitation and at information that the State party's focus is on smuggling of human beings other than trafficking in persons.

29. The Committee notes that prostitution is legal in the State party. However, it is concerned at the lack of specific information on the existing programmes for women who wish to leave prostitution and the specific policy measures aimed at prosecuting “lover boys” who exploit women and girls in prostitution. The Committee is also concerned that a planned survey on women in prostitution is yet to be conducted in Aruba. The Committee notes that the draft law on the Regulation of Prostitution and Combating Abuses in the Sex Industry, which removed the provisions on compulsory registration for women in prostitution and the obligation of a client to verify registration, was adopted by the House of Representatives and is now pending before the Senate.

**Participation in political and public life**

31. The Committee commends the State party for its efforts to increase women’s representation in decision-making positions such as the development of an action plan that seeks to achieve at least 30 per cent representation of women in the senior civil service (ABD). The Committee also commends the State party for having achieved at least 30 per cent representation of women in both houses of parliament and at ministerial level. However, the Committee is concerned at:

- (a) The low number of women mayors, professors and senior diplomats; and
- (b) The under-representation of women in political and public life in high-level decision-making positions in Curaçao.

**Education**

33. The Committee notes the generally high quality of education in the State party and welcomes the range of steps taken to further improve access by women and girls to high-quality education in the State party. Nevertheless, the Committee is concerned by: (a) The persistent segregation in the field of education, in particular in vocational training and higher education, and the underrepresentation of women and girls in traditionally male-dominated subjects in senior secondary general education and pre-university education; (b) The negative impact of

the lack of measures for pregnant students in middle-level applied education and tertiary education and of the implementation of the Work and Security Act of 2015 on researchers on temporary work contracts who are pregnant or taking parental leave, which has caused students to drop out of education, damaged academic career prospects for female students and resulted in a loss of talent that could have benefited society in academic research;

**Employment**

35. The Committee welcomes the adoption of the Flexible Working Arrangements Law, which entered into force in January 2016 and the adoption of a Country Action Plan on Discrimination in the Labour Market. However, the Committee is concerned at continued horizontal and vertical occupational segregation, with women being concentrated in part time work predominantly due to child care responsibilities, which adversely affects women's career development and pension benefits. The Committee is particularly concerned at:

- (a) The persistent gender wage gap partly due to the fact that a relatively high number of women work part-time;
- (b) The fact that women take more hours of parental leave per week than men notwithstanding the increase in the entitlement to parental leave days for men;
- (c) The drop in the use of child-care facilities notwithstanding the increased funding for childcare services;
- (d) The lack of information provided to the Committee on the labour market participation of women of migrant origin and on the labour exploitation of ethnic minority women who frequently work more hours;
- (e) The high number of women who have experienced discrimination based on pregnancy according to a study done by the Netherlands Institute for Human Rights and the underreporting of cases regarding sexual harassment;

(g) The fact that women domestic workers still do not enjoy full social and labour protection due to provisions of the Home Services regulation currently in force.

**Health**

37. The Committee welcomes the steps taken by the State party to raise awareness among stakeholders, such as doctors and insurance companies, about the need for gender-sensitive health care, including the drawing up of a strategic plan for the launch of a widely supported health-care programme. Nevertheless, the Committee notes with concern that no information was provided about the human, technical and financial resources allocated to that programme and whether special attention has been paid to intersecting forms of discrimination. The Committee notes with particular concern that:

(a) Medication for menstrual regulation such as Misoprostol is still not available at pharmacies by prescription from general medical practitioners;

**Disadvantaged groups of women**

39. The Committee notes with concern that women and children are at higher risk of poverty than men and that women accumulate lower pension benefits than men, resulting in higher poverty rates among older women. The Committee is also concerned that women provide most of the informal care work, which hampers their economic independence. It is further concerned at the remaining obstacles that women of migrant origin face in various fields, including intersecting forms of discrimination notwithstanding the efforts made by the State party to integrate them.

**Rural women**

41. The Committee welcomes the adoption of the Population Decline Action Plan 2015-2019, which sets out a strategy to address the impact

of regional population decline in less-urbanized areas. Nevertheless, the Committee is concerned by the lack of integration of a gender perspective therein and the fact that the population decline is accompanied by a reduction of transport and social services, which affects women disproportionately. The Committee also notes with concern that women in Curaçao, in particular those who earn low wages, face difficulties in terms of access to public transport and other services.

42. The Committee recommends that the State Party ensure the integration of a gender perspective into the Population Decline Action Plan 2015-2019 and provide information in its next periodic report on the overall situation of rural women and women living in less-urbanized regions, highlighting the impact of the progress of population decline on women's access to public transport, employment, health and other basic services. The State party should also provide information on the steps taken to address the limited access to public transport and other services of women who earn low wages in Curaçao.

**Marriage and family relations**

43. The Committee notes the State party's efforts to address the phenomenon of marital captivity in the State party. The Committee is particularly concerned by: (a) The lack of information about whether judges in the State party systematically assess domestic violence before deciding on child custody; (b) The lack of information about whether, when determining the distribution of property upon divorce, judges take into account the differences in the earning potential and human capital of spouses and address gender-based economic disparities between spouses resulting from the existing sex segregation of the labour market, the gender wage gap and women's disproportionate share in unpaid work such as childcare; (c) The fact that the civic integration test that is required for the purposes of family reunification has become more difficult such that less-educated women are unable to pass it; (d) The lack of information about whether judges are trained to enforce the law regarding marital captivity by imposing fines when a spouse "wrongfully refuses to cooperate in a divorce".

44. The Committee recommends that the State party: (a) Ensure, including through the training of judges, that gender-based violence against women in the domestic sphere is taken into account in decisions

|                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |         |                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|-------------------------------------------|
|                                                                                                                                                                                                                                                                                                                             | <p>on child custody or visitation rights and raise awareness among the judiciary of the negative impact of domestic violence on a child's development; (b) In line with the Committee's general recommendation No. 29 (2013) on the economic consequences of marriage, family relations and their dissolution, examine the economic consequences of divorce on both spouses, paying specific attention to the differences in the earning potential and human capital of spouses and the gender-based economic disparities between spouses resulting from the existing sex segregation of the labour market, the gender wage gap and women's disproportionate share in unpaid work, as well as to whether judges take such factors into account in their decisions; (c) Revise the civic integration test to ensure that it does not impede family reunification for women who are less educated; (d) Conduct awareness-raising campaigns and training on marital captivity for the judiciary and law enforcement officials with a view to eradicating the phenomenon.</p> <p><b>Women and peace and security</b></p> <p>45. The Committee notes with satisfaction the State party's commendable efforts in the area of women, peace and security, such as the adoption of a national action plan on women and peace and security, covering the period 2016-2019, its engagement in missions charged with the reconstruction of conflict-affected countries and its active role in preventing and resolving conflicts in many regions. While recognizing that the State party conducts a human rights impact assessment, including with regard to women's rights, before approving arms export licences, the Committee, however, notes with concern that public scrutiny of such assessments is not allowed.</p> |         |                                           |

| The 2015 ITUC Global Rights Index ranks 141 countries against 97 intercountryly recognized indicators to assess where workers' rights are best protected, in law and in practice. The Survey provides information on violations of the rights to freedom of association, collective bargaining and strike as defined by ILO | The Netherlands is classified in the category 1: "Irregular violations of rights"                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Country | Low risk for violation of workers' rights |

|                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                |                                          |

This can mainly be explained by differences in education, professional level, fulltime/part-time work and working experience. The differences are getting smaller (see figure), among others due to an increasing education level of women. Young women have higher salaries than young men.</p> <p>Figure: Gender wage gap in 2008, 2010, 2012 and 2014.<br/> Bedrijfsleven = Corporate sector<br/> Overheid = Government<br/> Trend (bedrijfsleven) = trend corporate sector<br/> Trend (overheid) = trend government</p>          |                | <p>Low risk on gender wage gap</p>       |

This study finds a gender wage gap, but concludes that it can be explained by differences in education, professional level, fulltime/part-time work and working experience. Furthermore, the trend is going down. The Working Group decided low risk on the basis of this study.

Interview with expert Jacqueline Kraan, coordinator labour Union CNV Vakmensen

According to Jacqueline Kraan, most forest owners and forest contractors follow the Collective Labour Agreement Forest and Nature (CAO Bos en Natuur). This CAO has a system of scales for salaries. Although the CAO has not been declared binding, almost all forest management organisations and forest contractors organisations follow the agreement. (Note: the state forest commission has its own agreement). According to Jacqueline Kraan, the collective agreement is also part of a certification scheme for forest contractors. This means that the chance of unequal payment between men and women (for the same work) in Dutch forestry is low.

In general, the pay gap is explained by women working more often in part-time, women working less often in executive positions, and by women re-entering the labour market (e.g. after having taken care for their children) and starting in low salary scale.

Country

Low risk on gender wage gap

|                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |         |                                           |

| <p>Arbeidsmarktportage bos- en natuurbeheer 2014:<br/> <a href="https://www.vbne.nl/Uploaded_files/Zelf/overige%20producten/rapportarbeidsmarktonderzoekbosennatuur2014.d11a4c.pdf">https://www.vbne.nl/Uploaded_files/Zelf/overige%20producten/rapportarbeidsmarktonderzoekbosennatuur2014.d11a4c.pdf</a></p>                                                           | <p>In the Netherlands 3175 persons are employed in the forest and nature sector. 48% is employed in forestry (1524 persons) of which approximately 183 are women. Approximately 130 (or 70%) of those women is employed by the State Forest Service (which is FSC-certified), which by following the General Public Workers Agreement (Algemeen Rijksambtenaren Reglement) has a policy for equal payment for men and women for same functions. .<br/> This would leave another 53 women in the forestry sector where there may (or may not) be an issue with gender wage gap. So, when focusing at the forest sector it appears that we are not dealing with a substantial problem (where numbers of employees are concerned).<br/> Note: the relatively low number of women employed in the forestry sector is mainly due to the type of work (rather harsh and physical work)</p> | Country | Low risk on gender wage gap               |
| <p>Interview with Ans Merens, Sociaal Cultureel Planbureau (Social Cultural Planning Office) (May 2017) on conclusions of Emancipatiemonitor 2016 (p. 155-158);<br/> <a href="https://www.scp.nl/Publicaties/Alle_publicaties/Publicaties_2016/Emancipatiemonitor_2016">https://www.scp.nl/Publicaties/Alle_publicaties/Publicaties_2016/Emancipatiemonitor_2016</a></p> | <p>According to the CBS research (which this part of the Emancipatiemonitor is based on), some of the differences in payment of men and women may be explained by differences in, among others, level of education, experience, holding a management function, sector. The unexplained part of the pay gap could possibly be ascribed to discrimination but also to other not-measured gender differences (e.g. negotiations) or still unknown differences.</p>                                                                                                                                                                                                                                                                                                                                                                                                                      | Country | Low risk on gender wage gap               |

| <p>The study on all aspects of labour rights including rights as specified in ILO Fundamental Principles and Rights at work showed that:</p> <ul style="list-style-type: none"> <li>• Social rights are covered by the relevant legislation and enforced in the country or area concerned</li> <li>• Rights like freedom of association and collective bargaining are upheld</li> <li>• There is evidence confirming absence of compulsory and/or forced labour</li> <li>• There is evidence confirming absence of discrimination.</li> <li>• There is evidence confirming absence of child labour</li> <li>• The Netherlands is signatory to the relevant ILO Conventions</li> </ul> <p>The following 'low risk' thresholds apply for freedom of association and collective bargaining, child and forced labour:<br/> (10) Applicable legislation for the area under assessment covers all ILO Fundamental Principles and Rights at Work, AND the risk assessment for the relevant indicators of Category 1 confirms enforcement of applicable legislation ('low risk'); AND<br/> (12) Other available evidence do not challenge a 'low risk' designation.</p> |                                                                                                          |         |          |

### Indicator 2.3. The rights of Indigenous and Traditional Peoples are upheld.

#### Guidance:

- Are there Indigenous Peoples (IP), and/or Traditional Peoples (TP) present in the area under assessment?
- Are the regulations included in the ILO Convention 169 and is UNDRIP enforced in the area concerned? (refer to category 1)
- Is there evidence of violations of legal and customary rights of IP/TP?
- Are there any conflicts of substantial magnitude [footnote 6] pertaining to the rights of Indigenous and/or Traditional Peoples and/or local communities with traditional rights?
- Are there any recognized laws and/or regulations and/or processes in place to resolve conflicts of substantial magnitude pertaining to TP or IP rights and/or communities with traditional rights?
- What evidence can demonstrate the enforcement of the laws and regulations identified above? (refer to category 1)
- Is the conflict resolution broadly accepted by affected stakeholders as being fair and equitable?

| <b>Conclusion on Indicator 2.3:</b><br>Based on United Nations and FSC definitions, no Traditional or Indigenous Peoples exist in the Netherlands.<br><br>The following 'low risk' thresholds apply:<br>(16) There is no evidence leading to a conclusion of presence of indigenous and/or traditional peoples in the area under assessment;<br>AND<br>(19) There is no evidence of conflict(s) of substantial magnitude pertaining to rights of indigenous and/or traditional peoples;<br>AND<br>(21) Other available evidence do not challenge a 'low risk' designation. |               | Country | Low risk |

## 5.3 CONTROLLED WOOD CATEGORY 3: WOOD FROM FORESTS IN WHICH HIGH CONSERVATION VALUES ARE THREATENED BY MANAGEMENT ACTIVITIES

### Summary of risk assessment process

The method employed for risk assessment is based on findings from the pilots and the initial experiences made by FSC International since the introduction of the policy FSC-PRO-60-002a V1-0.

The assessment scheme follows three fundamental questions:

- Is the conservation value as stipulated in the indicator and present as defined for the Netherlands?
- If yes, does forest management represent a danger?
- If yes, are protection mechanisms in place, are these sufficiently effective or, if impairments do exist, are compensation and correction measures, possible?

The assessment proceeds by means of a research of literature and 'grey' sources such as internet sources, expert statements and protocols, progressing from the general to an ever increasing level of detail, so that an information base is created. Employing the above sequence of questions, as soon as the finding 'low risk' can be arrived at, no further research pertaining to the subsequent questions need be pursued.

There are essentially two situations by which the assessment comes about:

- The three questions can, on the basis of a sufficient bedrock of information, unequivocally be answered with the finding 'low risk.' For this to occur, the information base must be such that there are no substantive suggestions that a 'specified risk' exists.
- One or more questions can, on the basis of a sufficient bedrock of information, unequivocally be answered with the finding 'specified risk.' Here it is in turn necessary to countercheck whether there may in fact be indications that a classification as 'low risk' could apply.

When assessing whether sufficient protection measures are in place, and whether these are effective, the three questions below are asked in sequence:

- Are protection measures in place?
- If yes, the following question applies: Are the specified protection measures sufficiently effective to control threats?
- If no, the following question applies: Do compensation or corrective measures follow violations of or non-compliance with protection measures?

Only once these specific questions have produced a negative finding is the risk classified as a 'specified risk.'

### General/contextual information

More than half of the Netherlands woodland consists of conifers (57%), mostly Scots pine, Douglas fir, larch and Norway spruce. The remaining woodland is deciduous, with oak, beech, birch and poplar the most common species. Some woods are dark and dense and have little or no understory; others are much lighter, with a rich tapestry of small plants on the forest floor. The density of trees is determined by the species and location, the age of the woodland, and how it is managed. Dutch woodland is rarely made up of only one tree species. About a third of the total forested area in the Netherlands is mixed woodland.

The composition and structure of Dutch woodlands is becoming more varied thanks to the increasing quantity of dead wood. Many plants and animals are dependent on older woodland and dead wood, and mature woods are more attractive for recreation. Surveys of tree diameters clearly show how Holland's woodlands are changing. Over the last 25 years, the number of thin trees (diameter 5-20 cm) has decreased while the number of thick specimens has grown. This clearly indicates that Dutch woodland is still in the growth phase, with a lower absolute number of trees but ones which are thicker and so account for a rapid increase in the stock of timber. There are therefore more older and larger trees.

The ratio of coniferous to broadleaf trees is changing, too. The number of young conifers (diameter 5-20 cm) has decreased much more over the past 25 years than the number of young broadleaves. Scots pine, larch and spruce have declined more compared to the total number of trees, while the number of native deciduous trees is increasing.

In the late 19th century and the early 20th, woodlands were a purely economic asset and were managed from an economic perspective. Single-species forests were planted and later all the trees were felled at once. Such “clear-cutting” is still practised in most of Europe’s forests, including the Ardennes and the Black Forest. Although the benefits of integrated woodland management had been known for some time, only a few woodland owners were initially willing to adopt it. This changed as the disadvantages of clear-cutting became increasingly evident: both its economic vulnerability (only a single product) and its vulnerability to natural phenomena such as storms and forest fires. In the 60s and 70s the Dutch public, unhappy with monoculture woodland, demanded that more attention be paid to the quality of the countryside and to opportunities for recreation. In the late 80s both the government and the forestry industry did a turn around and declared their support for integrated woodland management which could combine the various functions of woodland in a more balanced way.

The introduction of this type of management means that Dutch woodlands are being transformed from single-species woodlands with trees all of the same age to small-scale mixed woodland in which native species will predominate. The trees will also be of different ages, ensuring greater variation in woodland structure.

The Netherlands has over 160 [Natura 2000 areas](#). They are all part of the [National Ecological Network](#) (NEN), some of which still need to be created. Natura 2000 areas are protected under the Nature Conservancy Act. The European [Birds Directive](#) and [Habitats Directive](#) define what areas qualify as Natura 2000 areas. There is a fixed procedure for placing a nature area under the protection of Natura 2000. First, the Netherlands registers the area with the European Union. Then the Minister of Economic Affairs designates it a Natura 2000 area, by issuing a ‘designation order’. Eventually, the provincial authority, which is responsible for implementing nature policy, will draw up and officially adopt a management plan, in collaboration with all those involved with the area in question.

So when assessing the relevant HCV-categories for the Netherlands (HCV1, 3, 4 and 6) and particularly HCV 1 and 3 (1 and 3 are very closely interconnected, as species diversity is related to existence and/or sufficient protection and/or maintenance of ecosystems and habitats) the Working Group has taken into account that generally speaking ‘valuable forest’ is a rare asset in the Netherlands (no primary forests, forests relatively young) and that the Natura 2000 scheme is superimposing a fairly adequate protection regime over the Dutch (forest) landscape.

### **Definition of the categories for high conservation values**

High conservation values (HCVs) refer to biological, ecological, social or cultural values of exceptional or key significance. There are six HCV categories that are taken into consideration. The following definitions taken from the Dutch FSC Forest Standard, Annex G: HCV Framework for the Netherlands (FSC-STD-NLD-02-2018 EN THE NETHERLANDS. ALL FOREST TYPES AND SCALES, available online at: <https://ic.fsc.org/en/document-center/id/366>) are applied for the purposes of the risk assessment:

**HCV 1** Species diversity. Concentration of biological diversity including endemic, rare and endangered species of significance on a global, regional or country level.

**Definition for Netherlands:** Areas with an exceptionally high concentration of rare, threatened or endangered species.

**HCV 2** Landscape ecosystems and mosaics. Large landscape ecosystems and ecosystem mosaics of significance on a global, regional or country level and which contain viable populations of the large majority of the naturally occurring species in their natural composition with respect to distribution and frequency.

**Definition for Netherlands:** N.A. The Netherlands is one of the most crowded countries in the world. Approximately 14% of the landmass is nature area, most of which was and is intensively managed for wood and other products and therefore heavily fragmented by roads, agricultural land, villages etc.

**HCV 3 Ecosystems and habitats.** Rare, threatened or endangered ecosystems, habitats and refuges.

**Definition for Netherlands:** Protected Natura 2000-habitat types outside designated Natura 2000-areas of outstanding quality and in-situ populations of genetically native trees and shrubs (gene bank).

**HCV 4** Special ecosystem services. Fundamental, endangered ecosystem services including the protection of water catchment areas and protection against the erosion of endangered soils and slopes.

**Definition for Netherlands:** Drinking water collection areas.

**HCV 5** Needs of the resident communities. Sites and resources satisfying the basic needs of resident communities and indigenous populations (for their basis of existence, health, nutrition, water, etc.); identified with the participation of the local communities/indigenous population.

**Definition for Netherlands:** N.A. The Netherlands is a market economy and forests in the Netherlands are not providing basic needs of resident communities for their basis of existence. There are no indigenous people in the Netherlands.

**HCV 6** Cultural values. Sites, resources, habitats and landscapes of global or country cultural, archaeological or historical significance and/or or key cultural, ecological, economic or religious significance for the traditional cultures of the resident communities or indigenous population; identified with the participation of the resident communities and indigenous population.

**Definition for Netherlands:** Areas with an exceptionally high concentration of rare cultural historical elements and structures

#### Experts consulted

(Name and Organisation to be blackened in the document for public consultation)

Protected nature in the Netherlands: species and habitats in legislation and policy. The effect indicator.)</p> | <p>The chapters give a good indication of the main factors affecting the populations of these species in forests. One of the main factors affecting the status of fauna and birds is the increasing age of forests. Netherlands forests are relatively young and with age the characteristics of the forest change (older trees, dead trees, less light on the forest floor) which to a large extent determine the occurrence of fauna (birds). Apart from ageing of forests, planting of new forest is mentioned as a factor beneficiary for some species as well as management measures aimed at transition of forest dominated by coniferous into forest dominated by deciduous forest. Note that both ageing as well as transition to deciduous forests are generally considered as positive from an ecological point of view. For mushrooms the main determining factor is the deposition of nitrogen (high N-levels are almost solely caused by agriculture)</p> <p>The Balans voor de Leefomgeving (2018) (Balance for Environment) confirms this analysis where species composition is to a large extent determined by factors beyond the direct control of forest management: 'The quality of Dutch nature is largely determined by the spatial, water- and environmental conditions in the Nature Network Netherlands (NNN). Improvements in the nature quality is the result of the nature, water and environmental policies that have emerged over the last decades. The expansion of the Nature Network, the focused approach to infrastructural barriers and the construction of fish passages resulted in the enlargement of the habitat of many species and the spatial cohesion between habitats improved. Furthermore, in the recent decades the emission of polluting, acidifying and eutrophying substances is reduced thereby decreasing the environmental pressure on land and in water.'(p.146).</p> |                  |                                    |

The 'effects indicator' (see: Beschermd Natuur in Nederland: soorten en gebieden in wetgeving en beleid. . De effectenindicator) is an instrument with which possible harmful effects as a result of the activity and plans can be explored for any habitat type, including forest habitat types. Broekmeyer et al have produced a list of major disturbing factors (affecting occurring of species). Amongst those factors there are none that relate directly to forest management measures.</p> <p>According to the working group the sources referred to provide a good framework for assessing threats (caused by forest management measures, again if any) to HCV 3.</p> <p>HCV4:<br/> Provincial authorities designate groundwater protection areas, where kind and intensity of activities are limited. Especially with regard to the use of pesticides there are restrictions. The area is groundwater protection areas is approximately 123,000 ha. Some of the protection areas include forests (see F. van der Zee et al., 2016). As all water catchment areas are protected there is no literature available as to how forest management could negatively affect these areas. The Working Group concludes that these negative impacts are absent.</p> <p>HCV6: Jansen et al. (2013) have produced a practical manual for forest owners to identify and manage cultural historical elements and structures. According to the authors the main threat to such elements and structures is</p> |                  |                                    |

Characteristic species also slightly increase.<br/>           (Compendium voor de Leefomgeving (1))</p> <p>There are no endemic species in the Netherlands. Rare, threatened and endangered species in the Netherlands are registered in Red lists. There are 18 red lists in the Netherlands. A Red List is a list of species that have disappeared from the Netherlands or in danger of disappearing. This is determined on the basis of rarity and/or a negative trend. The lists are periodically determined by the Ministry of Agriculture, Nature and Food Quality.<br/>           The number of species on the Red List of endangered species in the Netherlands is one of the measures for the status of Dutch biodiversity, alongside indicators on population trends of species and ecosystem quality. Between 1950 and 1995 the number of endangered species increased sharply and the number of non-endangered species has also decreased. More than a third of all species have ended up on the Red List during this period, because they are threatened to a greater or lesser extent. Between 1995 and 2005, the number of threatened species increased slightly, but after 2005 the number of threatened species declined slightly. The Red List, and with it the RLI length, has therefore become slightly shorter.<br/>           When zooming in on the individual species groups, we see that these trends are not only due to improvements in plants. There has also been an improvement since 1995 in dragonflies and mammals; the index values of these species groups in 2016 are lower than 100 for both RLI-length and RLI-color. The other species groups - breeding birds, reptiles, amphibians and butterflies - have more</p> |                  |                                    |

| Indicator | Sources of Information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | HCV occurrence and threat assessment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Functional scale | Risk designation and determination |

With the exception of the reptile species group, the degree of threat (RLI color) for these groups is also greater in 2016 than in 1995.</p> <p>The RLI shows an average. So even after 2005, many species have become more seriously threatened, but there are others that have progressed. Of the "vulnerable" and "sensitive" species, 28 improved and 22 which deteriorated. Nine species that were "seriously threatened" or "threatened" in 2005 continued to deteriorate in the period up to and including 2016, but 36 species have actually improved. It is precisely the most threatened species that have improved a bit. In addition, after 2005 more species have returned.</p> <p><i>Threats and safeguards identification and evaluation</i></p> <p>Generally, the decline of species diversity is linked to desiccation, eutrophication, acidification and fragmentation caused by agriculture and infrastructure and not by forest management measures (See Planbureau voor de Leefomgeving 2018)</p> <p>Broekmeyer at al (2005) have produced a list of major disturbing factors (affecting occurring of species). Amongst those factors there are none that relate directly to forest management measures.</p> <p>All species are protected by the Nature Conservation Act 2015, but the amount of protection varies. Approximately 500 species that are mentioned in the Act, which are the most rare, endangered and threatened species in the Netherlands, have the strongest protection regime. A study on the effectiveness of the Nature Conservation Act showed that these laws are ecologically effective. The study (M.P. van Veen et al. 2011) concludes that nature legislation is ecologically effective because the presence of vulnerable, protected species and areas is taken into</p> |                  |                                    |

|           | <p>FSC-STD-NLD-02-2018 EN The Netherlands. all forest types and scales<br/> <a href="https://ic.fsc.org/en/document-center/id/366">https://ic.fsc.org/en/document-center/id/366</a></p> | <p>account in the permit or exemption application for activities like construction, demolishing of buildings or the cutting of trees. The code of conduct of the Nature Conservation Act applied to work such as forest or water management, ensure a higher level of awareness and better data collection (See: <a href="http://www.pbl.nl/sites/default/files/cms/publicaties/PBL_2011_Effectiviteitnatuurwetgeving_555084002.pdf">http://www.pbl.nl/sites/default/files/cms/publicaties/PBL_2011_Effectiviteitnatuurwetgeving_555084002.pdf</a>).</p> <p>The effects of the Code of Conduct Forest management has been evaluated for the period 2005 (when code was first established) – 2009. Research (Loes van den Bremer &amp; André van Kleunen, 2009) indicates (amongst other things) a decline in the number of red list species (birds). For Green Woodpecker (<i>Picus viridis</i>), Gray Flycatcher (<i>Muscicapa striata</i>) and Nightjar (<i>Caprimulgus europaeus</i>) there is an increase in numbers, but for Draaihals (<i>Jynx torquilla</i>), Matkop (<i>Poecile montanus</i>), Ransuil (<i>Asio otus</i>), Koekoek (<i>Cuculus canorus</i>), Wielewaal (<i>Oriolus oriolus</i>) en Zomertortel (<i>Streptopelia turtur</i>) numbers have declined. (Van den Bremer &amp; Van Kleunen, 2009, p.13).</p> <p>The causes are generally <u>not</u> related to the Code of Conduct (that is forest management measures) but rather to conversion of forest into heather (positive for Nightjar; note: conversion of forest into heather is imposed by EU policy as heather is a highly appreciated Natura 2000 habitat).</p> <p>“The causes of these decreases are often not known in detail, but in any case have to do with changed forest composition (more deciduous trees) and drying out (Matkop ((<i>Poecile montanus</i>) and Wielewaal (<i>Oriolus oriolus</i>), food availability and predation (Long-eared owl, <i>Asio otus</i>) and conditions in the wintering and / or migrating areas ((<i>Koekoek Cuculus canorus</i>, <i>Wielewaal Oriolus oriolus</i>)).” (Van den Bremer &amp; Van Kleunen, 2009, p. 13)</p> |                  |                                    |

The significance of the drinking water sector for nature in the Netherlands. Wageningen, 2016)</p> <p>FSC-STD-NLD-02-2018 EN THE NETHERLANDS. ALL FOREST TYPES AND SCALES. FSC National Forest Stewardship Standard of The Netherlands<br/> <a href="https://ic.fsc.org/en/document-center/id/366">https://ic.fsc.org/en/document-center/id/366</a></p> | <p><i>Threats and safeguards identification and evaluation</i></p> <p>Forests in the Netherlands play a significant role in clean drinking water supply due to the limited use of pesticides, herbicides and fertilizer in forestry. These areas are specifically protected for this service by the Provincial Environmental Regulation and Provincial Spatial Regulation. (source: Environmental Act) The juridical basis for these provincial regulations is the Environmental Act 1979 (see Sources of Information column).</p> <p>Water extraction areas owned and managed by drinking water companies have the main management goal of production of clean drinking water. Other goals are nature conservation and recreation. (source: Vewin, see left column).</p> <p>A study on the quality of the management of nature areas by drinking water companies showed that the biodiversity is high (75-95% of all species in the Netherlands are also found in the areas managed by drinking water companies) and many red list species occur (source: <a href="#">F. van der Zee et al. 2016</a>).</p> <p>According to the Working Group this is a clear indication that HCV4 is not threatened nor in general nor by forest management activities.</p> <p>Note that the Standard Development Group for the Netherlands already concluded that HCV4 does occur in the Netherlands but is sufficiently protected by legislation. (FSC National Forest Stewardship Standard of The Netherlands). This is confirmed by the chairman of the Standard Development Group Ernst Cramer.</p> <p>There are no specific information sources on the threats to drinking water resources by other management organisations, but the Working Group has no indications</p> |                  |                                    |

Protected sites and elements are identified and documented in the Country Archis database. Owners have the obligation to protect these protected sites and elements. The Cultural Heritage Agency of the Ministry of Education, Culture and Science is responsible for Archis and the enforcement of the Heritage Act. 1435 Country archeological monuments are protected.</p> <p>To protect archeological sites which have not yet been identified, Archis also contains an indicative Archeological Value Map. This map gives an indication of the chance to find archeological remains in the ground. When planning earth work these chances have to be taken into account to ensure that possible archeological elements are not disturbed.</p> <p>The Heritage Act states (article 5.1) that all activities are prohibited which lead to disturbance of the soil, or disturbance or total or partial displacement or removal of an archaeological monument or cultural heritage or the placements of these elements under water. Unless the activities are carried out by an organization certified against BRL 4000. This BRL-scheme is developed by Central College of Experts Archeology.</p> <p>(source: Ministerie Onderwijs, Cultuur &amp; Wetenschap Archeologie in Nederland)</p> <p>Documents for certification can be found here:<br/><a href="https://www.sikb.nl/archeologie/richtlijnen/brl-4000">https://www.sikb.nl/archeologie/richtlijnen/brl-4000</a></p> <p><i>Threats and safeguards identification and evaluation</i></p> <p>The last 10 years have shown an increasing interest in cultural heritage in forest management in the Netherlands. The Dutch forests harbor thousands of relics of the past, either connected to the forest itself or a former land-use. It</p> |                  | <p>occurrence is likely in the area under assessment, but it is effectively protected from threats caused by management activities.</p> |

BRL 4000 Archeology.)</p> | <p>is impossible to actively protect all of these cultural heritage elements, but important sites and elements are protected by forest managers (Jansen et al., 2013).</p> <p>An interview with expert Martijn Boosten showed that the level of protection of both archeological and cultural heritage elements and structures has increased sharply in the last 10 years. Archeological and cultural heritage values are not threatened by forest management, says Boosten. He adds that in the past 15 years he has only come across a handful of damaged elements where the damage was caused by forest management. Those damages were not severe damages.</p> <p><i>Risk specification</i><br/> Risk threshold (29) is met: HCV 6 is identified and/or its occurrence is likely in the area under assessment, but it is effectively protected from threats caused by management activities.</p> <p>The risk of this indicator is considered to be LOW.</p> |                  |                                    |

## 5.4 CONTROLLED WOOD CATEGORY 4: WOOD FROM FORESTS BEING CONVERTED TO PLANTATIONS OR NON-FOREST USE

### Summary of risk assessment process

This category assesses whether conversion of natural forests to plantations or non-forest use in the area under assessment is less than 0.02% or 5000 hectares average net annual loss for the past 5 years (whichever is less) or whether conversion is illegal at the national or regional level on public and private land.

For this assessment we have taken all forest in the Netherlands into consideration. An attempt has been made to limit the assessment to old forests (comparable to the approach in the UK where a category of semi natural woodlands is distinguished). However, this approach turned out not be feasible in the Netherlands. Although 'old forests' have been mapped once it turned out not be possible to effectively compare these data with other forest cover data.

The main source of information for this category is a publication of Wageningen University (2017) revealing a net loss of forest area over the last five years. The publication is based on LULUCF data produced by the Netherlands.

Based on the data available the working group has concluded that for Category for the risk is specified.

### General/contextual information

| Indicator                                                                                                                                                                                                                                                                | Source of information                                                                                                                                                                                    | Functional scale                                                            | Risk designation and determination                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                     |                    |                    |              |                       |                                                                                                                                             |                                                                             |                                                                                                                                                                                                      |

| <p>Note: The Code of Conduct Forest Management mainly regulates timber harvesting in the birds breeding season. Harvesting in mixed- and hardwood forests is forbidden between March 15 and August 15. Harvesting in coniferous forests is only allowed if a bird breeding inventory has shown that no breeding birds are located in the relevant forest stands. (Semi-) Permanent habitats always have to be inventoried before harvesting and protected, such as anthills, dens, nests of bird of prey etc.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |                           |  |
| <p>All these four cumulative regimes have strict 'nee, tenzij'-regimes ('no, unless-regimes'): no activities can take place, unless the (cumulative) assessments have been made and permission can be granted in accordance with the legislative demands. Therefore, logging activities should face four regimes as a cumulation before any activity can take place. Therefore, logging activities can only happen if the applicability (validity) of all four regimes have been assessed and show that the activity is acceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |                           |  |
| <p>In sum, the EU nature conservation <i>acquis communautaire</i> has been completely and rigidly implemented and has even been complemented with extra cumulative domestic forestry and nature conservation legislation ('double safety net'). This <i>acquis</i> and domestic forest and nature conservation law is considered to be a strict protection scheme and therefore an essential part of a symbiotic policy mix combatting illegal logging, leading to and supporting the overall required EUTR due diligence (DDS). (Kirstenkas 2013, Kirstenkas et al 2017).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |                           |  |
| <p><i>Is the law enforced?</i><br/> Every province has several law enforcers for the Nature Conservation Act. They proactively visit harvesting sites and are sometimes notified of proposedly incorrect timber harvesting. They also use aerial photography to check fellings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |                           |  |
| <p>The country coordinator of forest felling enforcers (formerly Forest Act) Leon Janssen has indicated that provinces employ on average 2-3 people enforcers. These provincial enforcers meet regularly at national level where they discuss amongst other things violations of the Nature Conservation Act. Violations do occur, but according to Leon Janssen they are mostly small scale and mostly concern small patches of trees in open landscape (lanes lined with trees, small wood stands). For the law also these lanes and smaller stands are considered wood lands where prior notification of felling and replanting is obliged. In most of these cases replanting does not occur, as creation of agricultural land is the main driver. Janssen estimates that at national level around 100 of these small scale fellings occur annually. This is confirmed by Ben Molendijk. He adds that it concerns small patches. Areas of 0,5 hectare is very exceptional. Molendijk also adds that in case this kind of illegal felling is discovered and followed up the authorities enforce replanting of the area.</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |                           |  |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Fitness check of the EU Nature Legislation (Birds and Habitats Directives). SWD(2016) 472 final. Brussels, 2016.<br/><a href="http://ec.europa.eu/environment/nature/legislation/fitness_check/documents/nature_fitness_check.pdf">http://ec.europa.eu/environment/nature/legislation/fitness_check/documents/nature_fitness_check.pdf</a></p> <p>FSC Glossary of Terms FSC-STD-01-002 Updated: 19 October 2017<br/><a href="https://ic.fsc.org/en/document-center/id/60">https://ic.fsc.org/en/document-center/id/60</a></p> |  | <p>There are no statistics of illegal fellings (or in general illegal forest management activities) in Natura 2000 areas. According to law enforcer Van Gervink illegal felling within N2000 areas does take place but is limited in area (a few hectares per year). Illegal felling may be both intentional (party is aware of breaching the law, e.g. without applying for necessary permit) as well as unintentional (party thought the activity was allowed according to N2000 management plan). Van Gervink says that total area felled is 'not shocking' (note: total land area N2000 is 340.000 hectares).</p> <p>Cases are mainly settled out of court. It is rare that the courts challenges recognized forest managers for violation of forest felling procedures. Law enforcement is therefore strong on this subject. This is confirmed by the Working Group. According to the Working Group there is a strong public involvement in timber harvesting the Netherlands. The public regularly reacts on what they think is incorrect timber harvesting (e.g. harvesting during bird breeding season). Data exist on the number of violations, but are used for internal purposes only by the (provincial) governments and are therefore not publicly available..</p> <p><i>Is it possible to conclude that the spatial threshold (0.02% or 5000 ha) can be met by assessing the enforcement of legislation?</i><br/>No.</p> <p><b>Assessment based on spatial data</b><br/><i>Is it possible to conclude that the spatial threshold (0.02% or 5000 ha) is met?</i></p> <p>The natural forest area has increased in the period between the 5<sup>th</sup> Country Inventory (approx. 2004; see Dirkse et al 2007) and the 6<sup>th</sup> Country Inventory (approx. 2015, see Schelhaas et al 2014) from 370.041 to 373.480 hectares. Plantations do not exist in the Netherlands when the following FSC-definition of plantations is used:<br/>"A forest area established by planting or sowing with using either alien or native species, often with one or few species, regular spacing and even ages, and which lacks most of the principal characteristics and key elements of natural forests" (FSC FSC-STD-01-002 FSC Glossary of terms). So all forest in the Netherlands are currently considered as natural forests. The standing (living) stock increased in the same period from 195,6 to 223,2 m3/ha, showing that harvest was substantially below growing stock. Conversion of natural forests to plantations or non-forest use in the area under assessment is less than 0.02%.(source forest inventory).</p> <p>The Country Forest Inventory shows that the forested area and growing stock are steadily growing since the first Country Forest Inventory in (1939-1942) (in reality the forested area has steadily grown since 1800 from approximately 150.000 hectares to 373.480 hectares now). The standing (living) stock increased from 195,6 m3/ha around 1940 to 223,2 m3/ha more recently, showing that harvest was substantially below growing stock (Schelhaas et al 2014).</p> |

|--|--|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  |  | <p>However, a publication (Schelhaas et al, 2017) from late 2017 concludes that based on research the forested area in the Netherlands recently has decreased: in the period of 2013-2017 the area of forest in the Netherlands has decreased annually by 1350 hectares. Total forested area in 2013 was 375.679 ha, whereas in 2017 this was 364.830 ha (minus 2,9%). On average 3036 hectares of forest have disappeared each year, which is only partly offset by the annual planting of 1686 hectares of new forest elsewhere. The main causes of conversion are conversion to Natura 2000 habitat (38%) (Note that this conversion is a legal obligation), logging of temporarily planted areas (11%) and conversion for infrastructure (9%).</p> <p><b><u>Risk designation</u></b><br/>The risk for this indicator is considered to be specified.</p> <p>The following 'specified risk' thresholds applies:<br/>(4) There is more than 5000 ha net average annual loss or there is more than 0.02% net average annual loss of natural forest in the assessment area in the past 5 years;</p> |

#### Control Measures

| Indicator | Recommended Control Measure                                                                                                                                           |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1       | Obtain a signed statement by the supplier revealing the origin of the timber and assurance that the timber does not come from conversion of forest to other land use. |

## 5.5 CONTROLLED WOOD CATEGORY 5: WOOD FROM FORESTS IN WHICH GENETICALLY MODIFIED TREES ARE PLANTED

### General/contextual information

The Netherlands has strong legislation on GMO until now and according to the Working Group there is no interest in the Dutch forest sector to use GMO. A major reason for this is that most forest are not managed for wood production solely, but forests always also have to provide other services such as nature conservation, cultural heritage and recreation opportunities. Wood revenues are only a proportion of the income of forest owners. In 2015 for example wood revenues were 46% of total revenues (Silvis & Voskuilen, 2017). Plantations as defined by FSC do not exist in the Netherlands.

### Risk assessment

| Indicator | Sources of information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Functional scale | Risk designation and determination                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
