

Overview of the FSC Certification Requirements

This document provides an overview of normative documents that are applicable to the different types of FSC certification (FM, CoC, CW) and scope (reclaimed or controlled materials). The document helps certificate holders understand the requirements they have to comply with*.

The document is separated into the following four sections:

If you are FM or FM/CoC certified, please refer to the following section:

If you are CW-FM certified, please refer to the following section:

If you are CoC certified, please refer to the following section:

If you hold a Project certification, please refer to the following section:

FM:	Forest Management
CW-FM:	Controlled Wood for Forest Management
CoC:	Chain of Custody
Project - CoC:	Project certification

Structure of individual sections

Each section refers to a set of normative documents that are grouped thematically.

Each section also differentiates between normative documents that are applicable to all organizations (marked in the color of the section, e.g. FSC-STD-40-004 for CoC) and those that are 'optional' (marked in grey, e.g. additional requirements when certified as a group member for FM), depending on your scope of certification.

How you can access normative documents

When you click on the link of the document title you will in most cases directly access the most recent current version of the document in the FSC [Document Centre](#). Where both the most recent version of a normative document and the older version are still valid for certification during the transition period a notification will appear. You should contact your certification body to clarify which version of the document is applicable in this case.

In the case of National Forest Stewardship Standards or Controlled Wood Risk Assessments you will need to search for the respective country to find the applicable standard.
