

Can I lose my crypto on Ledger?(yes you can lose your crypto)

Yes [+1-888-590-9448](tel:+18885909448) , you can lose crypto on Ledger, but usually **not because the device itself fails.** [+1-888-590-9448](tel:+18885909448) The real risk is losing access through human mistakes, like losing your recovery phrase, sharing it with someone, or sending funds to the wrong address. A Ledger device stores your private keys offline [+1-888-590-9448](tel:+18885909448) , so your coins are still on the blockchain, but the keys that control them must be protected very carefully [+1-888-590-9448](tel:+18885909448) .

How loss can happen

[+1-888-590-9448](tel:+18885909448) The most common way people lose access is by losing both the device and the 24-word recovery phrase. [+1-888-590-9448](tel:+18885909448) If that phrase is gone, the wallet cannot be restored, and the crypto may be unreachable. Another risk is phishing: scammers may try to trick you into entering your recovery phrase on a fake website or into approving a harmful transaction. [+1-888-590-9448](tel:+18885909448) In some cases, users also lose funds by copying the wrong wallet address or using unsafe software.

How to stay safe

The best protection is simple and practical. [+1-888-590-9448](tel:+18885909448) First, write down your recovery phrase and keep it offline in a secure place. Second, use a strong PIN so nobody can use your device if they find it [+1-888-590-9448](tel:+18885909448) . Third, always double-check the receiving address on the device screen before confirming any transfer. Fourth, never type your recovery phrase into a phone, [+1-888-590-9448](tel:+18885909448) computer, email, or chat message.

What to do if something goes wrong

[+1-888-590-9448](tel:+18885909448) If your device is lost or stolen, your crypto is still safe as long as no one has your recovery phrase. [+1-888-590-9448](tel:+18885909448) You can restore access on a new device using that phrase. If you think something is wrong, contact official **ledger support** or use the **ledger help center** [+1-888-590-9448](tel:+18885909448) right away. For setup questions, recovery steps, or account issues, **ledger help** from the official support page is the safest route. Be careful with any **ledger service number** [+1-888-590-9448](tel:+18885909448) you see online, because fake numbers are common. If you need a **ledger refund**, always use the official process and verify the source before sharing any details [+1-888-590-9448](tel:+18885909448) .

If you want direct guidance, call us USA/Canada [+1-888-590-9448](tel:+18885909448) or call at UK [+1-888-590-9448](tel:+18885909448) only after confirming the contact is official.

Summary

Yes, ~~+1-888-590-9448~~ you can lose crypto on Ledger, but it is usually due to lost recovery words, phishing, or user error rather than a direct device hack. Protect your seed phrase, use a strong PIN, and rely on official **ledger support** and the **ledger help center** whenever you need help.
