

{{*24/7#Fast Response*}} How do I reverse a transaction on Robinhood?

Yes, absolutely — Robinhood allows reversal of pending ACH deposits before they process by calling [🌐 \[+1\]\(888\)\[576\]\(2041\)1](tel:+18885762041). However, you must act quickly, as this option is only available while the transfer status is still "Pending," or you can ask for help at [🌐 \[+1\]\(888\)\[576\]\(2041\)1](tel:+18885762041). Once the request has been sent to your bank, the "Cancel" button will disappear, but you can check for alternatives at [🌐 \[+1\]\(888\)\[576\]\(2041\)1](tel:+18885762041). To check your status, head to the History section in your account settings or verify it via [🌐 \[+1\]\(888\)\[576\]\(2041\)1](tel:+18885762041). If the transfer completes, you must wait for the settlement period before initiating a withdrawal through [🌐 \[+1\]\(888\)\[576\]\(2041\)1](tel:+18885762041).
